Section _____

1. What gas is being collected in today's experiment?

2. Balance the following reaction:

3. In today's experiment you determine that you collected 1.33×10^{-3} mols of oxygen. Calculate (show your setup for the conversion!) how many mols of H_2O_2 were in your hydrogen peroxide solution. Note: You will need a conversion factor from the equation you balanced in question 2.

_____ mols of H_2O_2

4. Based on your answer above, how many grams of H_2O_2 were in the hydrogen peroxide solution? (H_2O_2 has a molecular weight of 34.0 g/mol)

_____ grams of H_2O_2

5. Assume the grams of H_2O_2 calculated in question 4 were found in a 6.00 gram sample of a hydrogen peroxide solution. Calculate the mass percent H_2O_2 in the solution.

_____ % H_2O_2

Laboratory Manual for Principles of General Chemistry J. A. Beran, Mark Lassiter, 2022-08-16 Laboratory Manual for Principles of General Chemistry 11th Edition covers two semesters of a general chemistry laboratory program The material focuses on the lab experiences that reinforce the concepts that not all experimental conclusions are the same and depend on identifying an appropriate experimental procedure selecting the proper apparatus employing the proper techniques systematically analyzing and interpreting the data and minimizing inherent variables As a result of good data a scientific and analytical conclusion is made which may or may not be right but is certainly consistent with the data Experiments write textbooks textbooks don't write experiments A student's scientific literacy grows when experiences and observations associated with the scientific method are encountered Further experimentation provides additional cause effect observations leading to an even better understanding of the experiment The 11th edition's experiments are informative and challenging while offering a solid foundation for technique safety and experimental procedure The reporting and analysis of the data and the pre and post lab questions focus on the intuitiveness of the experiment The experiments may accompany any general chemistry textbook and are compiled at the beginning of each curricular unit An Additional Notes column is included in each experiment's Report Sheet to provide a space for recording observations and data during the experiment Continued emphasis on handling data is supported by the Data Analysis section
