The Human Central Nervous System Rudolf Nieuwenhuys, Jan Voogd, Christiaan van Huijzen, 2007-12-31 The present edition of The Human Central Nervous System differs considerably from its predecessors In previous editions the text was essentially confined to a section dealing with the various functional systems of the brain This section which has been rewritten and updated is now preceded by 15 newly written chapters which introduce the pictorial material of the gross anatomy the blood vessels and meninges and the microstructure of its various parts and deal with the development topography and functional anatomy of the spinal cord the brain stem and the cerebellum the diencephalon and the telencephalon Great pains have been taken to cover the most recent concepts and data As suggested by the front cover there is a focus on the evolutionary development of the human brain Throughout the text numerous correlations with neuropathology and clinical neurology have been made After much thought we decided to replace the full Latin terminology cherished in all previous editions with English and Anglicized Latin terms It has been an emotional farewell from beautiful terms such as decussatio hipposideriformis Wnekinkii and pontes grisei caudatolenticulares Not only the text but also the pictorial material has been extended and brought into harmony with the present state of knowledge More than 230 new illustrations have been added and many others have been revised The number of macroscopical sections through the brain has been extended considerably Together these illustrations now comprise a complete and convenient atlas for interpreting neuroimaging studies

Anatomy of Spirituality: Portrait of the Soul Chander Behl, 2015-04-27 The domain of spirituality separated from its theological overburden believes in the existence of a spiritual self presumed to be distinctly separate from the psychological self The spiritual eternal self also known as the soul or spirit sometimes supported by an overarching Spirit is asserted to be operating behind the ephemeral self This book takes a contrarian stance it argues that the premise of the soul concept is obtained through the magic of language maintained through the marvel of the brain's biochemistry and sustained through the mirage of the psychological juggernauts of the brain The magic the marvel and the mirage together bring about subtle shifts as the linguistic brain suppresses many psychological details habitually applies mental templates such as inversions and dichotomies and enhances its language by coining religious and spiritual metaphors The consequence of these changes is that the usual flickering self begins to be impressed by itself believing it is buttressed by something transcendental and eternal within the soul or the spirit The self although indoctrinated during its formative years also begins to assimilate and accept the opinion that the overwhelming weight of religious doctrines and dogmas the overburden signifies as the legitimate proof for the eternal soul
