Caring for the Whole Musician: Awareness and Mindfulness Larry Lee Hensel, Alexander Kahn, 2023-05-10 Caring for the Whole Musician brings together insights from two expert musicians and educators to consider the relationship between mental and physical health and artistic practice for musicians Offering a holistic perspective that encompasses the whole being body mind and heart this book provides emerging musicians with tools practices and mindsets to address key challenges throughout their journey The first part Awareness addresses wellness and embodiment in music exploring how our bodies are constructed and how the use of our bodies as instruments affects function Using approaches including Body Mapping and the Alexander Technique this part helps readers discover adverse habits that interfere with natural movement and nurture awareness of the body The second part Mindfulness explores how meditative practice can be incorporated into every stage of concert preparation and embedded within the daily life of the musician Offering mindfulness exercises related to each stage of the music making process these chapters provide strategies for readers to enhance their well being and focus Centered in the understanding of the musician as a whole being this book provides an essential guide to how practices of awareness and mindfulness can allow musicians to better care for themselves and flourish in their artistic careers

Biopolitics After Neuroscience Jeffrey P. Bishop, M. Therese Lysaught, Andrew A. Michel, 2022-05-19 This book offers a provocative analysis of the neuroscience of morality Written by three leading scholars of science medicine and bioethics it critiques contemporary neuroscientific claims about individual morality and notions of good and evil Winner of a 2021 prize from the Expanded Reason Institute it connects moral philosophy to neoliberal economics and successfully challenges the idea that we can locate morality in the brain Instead of discovering the source of morality in the brain as they claim to do the popularizers of contemporary neuroscience are shown to participate in an understanding of human behavior that serves the vested interests of contemporary political economy Providing evidence that the history of claims about morality and brain function reach back 400 years the authors locate its genesis in the beginnings of modern philosophy science and economics They further map this trajectory through the economic and moral theories of Francis Bacon David Hume Jeremy Bentham John Stuart Mill and the Chicago School of Economics to uncover a pervasive colonial anthropology at play in the neuroscience of morality today The book concludes with a call for a humbler and more constrained neuroscience informed by a more robust human anthropology that embraces the nobility beauty frailties and flaws in being human

Teaching Public Administration with Pop Culture Erin L. Borry, Peter A. Jones, 2024-12-27 This book offers faculty teaching in public administration and public affairs programs a playbook for using popular culture as a pedagogical tool in the classroom Authors Erin L Borry and Peter A Jones build a pedagogical framework detailing the richness and range of media through which pop culture can be accessed and demonstrate how best to integrate different forms of pop culture to achieve various learning goals The breadth of content available and practical applicability to the public administration degree offer many

opportunities to incorporate pop culture into the curriculum including introductory courses in public administration and public service as well as more advanced budgeting statistics ethics social equity and open government courses to name a few This book offers some examples of pop culture that instructors can readily adapt for use in their own courses as well as sample assignments and various types of group work including simulations Teaching Public Administration with Pop Culture will be of enormous benefit to instructors of public affairs undergraduate and graduate students as well as to those teaching in the areas of political science civics social studies and government in higher and K 12 education settings Controversial Bodies John D. Lantos, 2011-09-07 Controversial fascinating disturbing and often beautiful plastinated human bodies such as those found at Body Worlds exhibitions throughout the world have gripped the public's imagination These displays have been lauded as educational sparked protests and drawn millions of visitors This book looks at the powerful sway these corpses hold over their living audiences everywhere Plastination was invented in the 1970s by German anatomist Gunther von Hagens The process transforms living tissues into moldable plastic that can then be hardened into a permanent shape Von Hagens first exhibited his expertly dissected artfully posed plastinated bodies in Japan in 1995 Since then his shows have continuously attracted so many paying customers that they have inspired imitators brought accusations of unethical or even illegal behavior and ignited vigorous debates among scientists educators religious leaders and law enforcement officials These lively thought provoking and sometimes personal essays reflect on such public displays from ethical legal cultural religious pedagogical and aesthetic perspectives They examine what lies behind the exhibitions popularity and explore the ramifications of turning corpses into a spectacle of amusement Contributions from bioethicists historians physicians anatomists theologians and novelists dig deeply into issues that compel upset and unsettle us all Raising Generation Tech Jim Taylor Ph.D, 2012-08-01 Today's children are being raised as digital natives in a world dominated by popular culture and technology TV shows computers video games social networking sites advertisements and cell phones too often have an unnecessarily strong and negative influence on children But pulling the plug just isn't an option in a world where being connected is essential for success In Raising Generation Tech noted parenting and new media expert Dr Jim Taylor explores how popular culture and technology shape children's lives The essential message from Raising Generation Tech is that excessive or unguided exposure to popular culture and technology is not good for children Rather than offering the usual end of days scenario Dr Taylor offers a balanced and optimistic perspective that offers parents insights and practical information they need to ensure that popular culture and technology are tools that benefit their children rather than weapons that hurt them Six Messages From Raising Generation Tech Popular culture may be the powerful influence on children today and most of that influence is not healthy to children Children are being exposed to technology earlier than ever without proper limits or guidance Excessive exposure to popular culture and technology has been linked to many childhood problems including shorter attention spans lower grades in school increased sexual activity and drug use and obesity Too early and unguided

immersion in popular culture and technology will actually hinder rather than better prepare children for life in the digital world. Key areas in which parents should focus their child rearing attention include their children's self-identity, values, thinking, relationships, and physical and mental health. The goal for parents is not to disconnect their children but rather to expose them to popular culture and technology when they are developmentally ready and then give them the perspectives, attitudes, and tools they need to thrive in this digital age.

Raising Generation Tech argues convincingly that children should be raised by their parents, not by popular culture or technology. Dr. Taylor tackles this difficult task with state-of-the-art psychological theory, the latest research, engaging anecdotes, and a healthy dose of sensitivity and humor. **Raising Generation Tech** is a must-read for parents who want their children to thrive in this media-fueled world, which means all parents.

Larry Rosen, Ph.D., author of *iDisorder: Understanding Our Obsession With Technology and Overcoming Its Hold on Us*. **Raising Generation Tech** will be an eye opener for parents. Rather than offering the usual end-of-the-world scenario, Dr. Jim Taylor offers a balanced perspective that gives parents the insights and practical information they need to ensure that popular culture and technology are tools that benefit their children rather than weapons that harm them.

Michele Borba, Ed.D., TODAY show contributor and author of *The Big Book of Parenting Solutions: 101 Answers to Your Everyday Challenges and Wildest Worries*. The essential message of **Raising Generation Tech** is that excessive or unguided exposure to popular culture and technology is not good for children. In today's world, parents can't just sit back and play defense. Dr. Jim Taylor empowers parents to prepare their children for life in this digital age.

Michelle LaRowe, author of *A Mom's Ultimate Book of Lists*, *Working Mom's 411*, and the *Nanny to the Rescue* parenting series. **Hard Sell** Dee Madigan, 2014-08-01. In **The Hard Sell**, creative director Dee Madigan uses her trademark humour and down-to-earth approach to unveil the world of political advertising. Drawing on real-life stories from her own recent Federal and State campaigns, she gives us fascinating industry insight into how political ads are designed to work, who they are designed to work on, how we pay for them, why we make so many negative ads, how personal is too personal, how spin works particularly in election campaigns, how to make messages cut through the cynicism, how politicians use journalists, who use politicians, who use journalists. The gendered nature of it all. And finally, what happens when it all turns to shit. Dee is candid about the tricks of the trade and the lessons that can be learnt.

Mediaweek, 2008-04. *The New York Times Index*, 2007. *Media Ethics* Chad Painter, Lee Wilkins, Erin E. Schauster, Philip Patterson, 2025-08-07. The eleventh edition of this authoritative book focuses on the most pressing media ethics issues, including coverage of the 2024 elections and the emergence of AI. Enabling students to make ethical decisions in an increasingly complex environment, the book focuses on practical ethical theory for use across the media curriculum. Twenty-three new cases address events from the Israel-Hamas war, AI-generated authors' privacy for underage influencers, Fox News election fraud claims, social media whistleblowers' threats to student-run media outlets, police posing as journalists, the Bud Light transgender ad uproar, the use of generative AI in advertising, the publication of graphic war images focusing

on the Ukraine Russia and Israel Hamas wars deep fakes in sexually explicit media the impact of Taylor Swift on the NFL video games requiring in game purchases to win and more Additional Features Each case has pedagogical questions that expand outward from the specifics of the case itself to ever larger issues suggested by the case Chapters in such areas as social justice media and democracy and loyalty discuss all types of media rather than segmenting the text by medium An introductory chapter in moral philosophy begins the text and a final chapter in moral development concludes it Text addresses the implications of digital content throughout multiple media industries and platforms Online material for students and instructors includes all cases from previous editions lecture slides essay questions and suggested classroom activities
