The instructor guide features a sample syllabus and course outline, chapter outlines, lab assignments and sample tests. An expanded presentation package provides more PowerPoint slides and additional graphics now in color that reinforce each chapter's key points. In this edition the number of slides has increased from 285 to more than 600 and the presentation package now contains over 100 photos. Through HKPropel students have access to interactive Understanding Check activities, flash cards, practice quizzes with automatic feedback and 19 video clips that demonstrate technique and offer correction guidance. The final chapter is revised to provide a summary and applications including more practical content in the form of summary figures or tables for bones, joints, muscle actions and alignment evaluation as well as sample mat exercises for dance conditioning. And throughout the book Clippinger has updated content to simplify, add more practical material and share best practices for injury prevention and rehabilitation. Primary Focus The third edition of the book retains its emphasis on presenting the anatomical and kinesiological material that is essential for dancers to understand. The text includes descriptions of joint structure, key muscles, movement analysis, sample strength and flexibility exercises, common alignment problems, select joint mechanics and special considerations for dance for each region of the body.
