Samaritan Scribes and Manuscripts Alan David Crown,2001 This book aims to provide the critical tools to help scholars in their use of Samaritan manuscripts The basic codicological tools is a series of complementary data bases compiled from typological studies of the physical properties of manuscripts Each typology is in effect a diachronic profile created by painstaking comparison and analysis of the physical properties of manuscripts of known provenance and or date Using these typologies or diachronic profiles it is possible to evaluate the chronology of the physical characteristics of any manuscript the quire or gathering structure ink ruling spacing of the text on the folio sewing of the sections Naturally the more information available about the physical properties of any manuscript the better the chance of making correlations between the typologies of different properties The basic rule in palaeography and codicology is that the researcher works on an inductive basis from as wide a sample as possible of dated manuscripts It is hoped that in the studies in this volume evidence has been provided which will serve as a guide both to the appearance and the nature of Samaritan manuscripts and to the evaluative process that one would employ in examining them for codicological purposes The reader should be able to apply the criteria provided here to the evaluation of whatever data can be retrieved from any undated Samaritan manuscripts with which he is confronted Alan D Crown in the preface
