J Spring

Alternatives For Long Range Ground Attack Systems:

Alternatives for Modernizing U.S. Fighter Forces David Alan Arthur, Kevin Eveker, 2009 Examines the capabilities and costs of the fighter force fielded under the DOD's FY 2009 plans

Alternatives for Modernizing U. S. Fighter Forces, 2010-10 The U S Air Force Navy and Marine Corps are in the process of replacing the bulk of today's fighter aircraft most of which were purchased in the 1980s with new F A 18E F F 22 and F 35 Joint Strike Fighter aircraft Although current procurement plans call for the purchase of about 2 500 aircraft over the next 25 years the services are projecting that those purchases will not keep pace with the need to retire today's aircraft as they reach the limit of their service life This study examines the capabilities and costs of the fighter force under DoD plans and the potential implications for DoD's long term budget and inventory levels if planned purchases of new aircraft are insufficient to maintain fighter inventories called for by current service requirements

The Army's Future Combat Systems Program and Alternatives United States. Congressional Budget Office, 2006

The Army's Future Combat Systems Program and Alternatives, 2006 In today's environment of rapidly evolving conflicts the Army's goal is to have units that have the combat power of heavy units but that can be transported anywhere in the world in a matter of days To address concerns about the armored vehicle fleet's aging and the difficulties involved in transporting it as well as to equip the Army more suitably to conduct operations overseas on short notice using forces based in the United States the service created the Future Combat Systems FCS program in 2000 A major modernization effort the program is designed in part to develop and purchase vehicles to replace those now in the heavy forces the new vehicles would be much lighter thereby easing the deployment of units equipped with them In the analysis presented in this report the Congressional Budget Office CBO examined the current status of the Army's fleet of armored vehicles and assessed the speed of deployment of the service's heavy forces It also evaluated the FCS program considering the program's costs as well as its advantages and disadvantages and comparing it with several alternative plans for modernizing the Army's heavy forces

Air Force Magazine, 2012

A CBO Study, The Army's Future Combat Systems Program and Alternatives, August 2006, 2006

Securing Freedom in the Global Commons Scott Jasper, 2010-02-10 This will be the first book to attempt to take a holistic approach to security in the Commons outer space the atmosphere the oceans cyberspace etc in that it examines in detail each domain of the commons identifying and assessing the current and future threats to free international access to the domain

Alternatives for Long-Range Ground-Attack Systems U. S. US Congress, Congressional Budget Office, 2014-11-07 The United States maintains a considerable capability to attack ground targets with conventional weapons anywhere in the world Air Force Navy and Marine Corps tactical aircraft deployed to forward locations can be used for ground attack or strike missions in the region where their bases or aircraft carriers are located and a similar regional capability is offered by Tomahawk cruise missiles launched from submarines or surface ships If air bases or aircraft carriers are not available in the region long range strike capability can be

provided by the Air Force's smaller fleet of long range bombers which can conduct missions from more distant bases including ones in the United States. The performance of the bomber force in Afghanistan Operation Enduring Freedom and Iraq Operation Iraqi Freedom confirmed the value of long range strike systems that are less dependent on having access to air bases close to the conflict. In Afghanistan strike aircraft were forced to fly very long missions with extensive airborne tanker support; fighters typically had to refuel many times during a mission because of basing and airspace restrictions in neighboring countries. In Operation Iraqi Freedom the availability of air bases was limited and the air bases in Kuwait were vulnerable to attack by Iraqi cruise and ballistic missiles. Although both air campaigns were successful if air operations of greater intensity or length had been needed those adverse circumstances might have posed problems. In contrast longrange bombers contributed to the campaigns over great distances from secure bases by operating from places such as Diego Garcia an island in the Indian Ocean.

Policy Options for Unmanned Aircraft Systems (UAS) Bernard Kempinski, 2011. UAS's hold great promise for the military but technology has only recently matured enough to exploit that potential. Much as the stealth fighter and Patriot missile came to public attention during the 1991 Gulf War surveillance and missile attack operations by Predator UAS have been publicized in the conflicts in Iraq and Afghanistan. The DoD's 2012 plan calls for purchasing more of the existing UAS for current operations improving the systems already in service and designing more capable UAS for the future. This report compares the costs of DoD's plans and the capabilities those plans might provide for reconnaissance and light attack missions with the costs and capabilities of some alternative options. Illus. This is a print on demand report.
