Additional examples for AMA style can be found at Dr. Abel Scribe's AMA Stat! website at <http://www.docstyles.com/amastat.htm>, College of St. Scholastica's Citation Help for the AMA, <http://libguides.ccs.edu/AMA/>, and NWTC Library Citation Guide <http://nwtc.libguides.com/citations>

## Paper Format

Specific instructions regarding title page format, page numbers, headings, font style and size, and margins are not stated in the AMA manual. Please ask your instructor for their preferences!

- Double space within the text of the paper.
- Single space within the abstract, notes, titles and headings, block quotes, tables and figures, and references.

## In Text Citations

AMA requires that in-text references be cited numerically in consecutive order using superscript Arabic numerals.

- Use the numerals outside periods and commas.  
In a recent report,<sup>1</sup> experts stated that the earth is round.
- Multiple sources can be cited together.  
Other reports<sup>2-3</sup> recommend eating spinach and oranges.
- Add page numbers to direct quotations. Put the page numbers in parentheses after the citation number.  
"... and the home of the brave."<sup>4</sup> (p. 45)
- You can create a superscript numeral in Word by highlighting the desired number and clicking on the superscript button  in the Font section at the top of the screen.

## References Page

- This is a separate page at the end of your paper. Each citation in the text must be listed on the References page; each listing on the References page must appear in the text.
- Left-justify the word References. Then double space and start your list with 1.
- References are listed numerically in the order they are cited in the text of the paper. Put a period after each number.
- Single space each reference. Double space between references.
