Julius Genachowski Capital Returns Edward Chancellor, 2016-05-04 We live in an age of serial asset bubbles and spectacular busts Economists policymakers central bankers and most people in the financial world have been blindsided by these busts while investors have lost trillions Economists argue that bubbles can only be spotted after they burst and that market moves are unpredictable Yet Marathon Asset Management a London based investment firm managing over 50 billion of assets has developed a relatively simple method for identifying and potentially avoiding them follow the money or rather the trail of investment Bubbles whether they affect a whole economy or merely a single industry tend to attract a splurge of capital spending Excessive investment drives down returns and leads inexorably to a bust This was the case with both the technology bubble at the turn of the century and the US housing bubble which followed shortly after More recently vast sums have been invested in mining and energy From an investor s perspective the trick is to avoid investing in sectors or markets where investment spending is unduly elevated and competition is fierce and to put one s money to work where capital expenditure is depressed competitive conditions are more favourable and as a result prospective investment returns are higher This capital cycle strategy encourages investors to eschew the simple growth and value dichotomy and identify firms that can deliver superior returns either because capital has been taken out of an industry or because the business has strong barriers to entry what Warren Buffett refers to as a moat Some of Marathon s most successful investments have come from obscure sometimes niche operations whose businesses are protected from the destructive forces of the capital cycle Capital Returns is a comprehensive introduction to the theory and practical implementation of the capital cycle approach to investment Edited and with an introduction by Edward Chancellor the book brings together 60 of the most insightful reports written between 2002 and 2014 by Marathon portfolio managers Capital Returns provides key insights into the capital cycle strategy all supported with real life examples from global brewers to the semiconductor industry showing how this approach can be usefully applied to different industry conditions and how prior to 2008 it helped protect assets from financial catastrophe This book will be a welcome reference for serious investors who looking to maximise portfolio returns over the long run The Weekly Japan Digest ,2000 **Computerworld** ,1999-07-19 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld s award winning Web site Computerworld com twice monthly publication focused conference series and custom research form the hub of the world s largest global IT media network *InfoWorld* ,2000-05-08 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects Computerworld ,2000-03-06 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld s award winning Web site Computerworld com twice monthly publication focused conference series and custom research form the hub of the world s largest global IT media network **Digital Business** Patrice Seuwou, 2025-08-05 This comprehensive guide explores the fundamentals of digital business from understanding
