

Notes Exchange

You are in charge of organizing the senior class party. The following is your estimate of the time required to perform all the necessary activities:

ACTIVITY	HOURS
A. Plan music playlist	0.5
B. Download music	1.0
C. Buy groceries and decorations	2.0
D. Bake cake and prepare food	1.5
E. Set-up	2.0

Since there are several classmates helping, some of these tasks can be performed at the same time. For instance, people can begin setting up the decorations while the cake is baking. However, you cannot bake the cake or set up until after the shopping has taken place. And you cannot begin downloading music until you know what songs you want to download. The following activity graph can be used to help organize this information:

1. What do the numbers in this graph represent?

The time it takes to do a thing

2. Why is there an arrow going from Activity A to Activity B, but not from Activity A to Activity C?

because you can't make a playlist without knowing the music, nor can you get groceries and start playlist planning

3. Beginning at Start, there are several paths through the graph (following the arrows) that end at Finish. For each path, calculate the total time required to perform all the activities along the path.

Path I: 1.5 hours

Path II: 3.5 hours

Path III: 4 hours

Constructed by a masterful musician of language, that interesting masterpiece conducts visitors on a mental trip, skillfully unraveling the concealed tunes and profound influence resonating within each cautiously crafted phrase. Within the depths of the emotional analysis, we shall discover the book is key harmonies, analyze their enthralling writing design, and surrender ourselves to the profound resonance that echoes in the depths of readers souls.
