The Impact of Globalization on the United States Michelle Bertho, Beverly Crawford, Edward A. Fogarty, 2008-09-30 Over the past decade a virtual cottage industry has arisen to produce books and articles describing the nature origins and impact of globalization Largely and surprisingly absent from this literature however has been extensive discussion of how globalization is affecting the United States itself Indeed it is rarely even acknowledged that while the United States may be providing a crucial impetus to globalization the process of globalization once set in motion has become a force unto itself Thus globalization has its own logic and demands that are having a profound impact within the United States often in ways that are unanticipated This set offers the first in depth systematic effort at assessing the United States not as a globalizing force but as a nation being transformed by globalization Among the topics studied are globalization in the form of intensified international linkages globalization as a universalizing and or Westernizing force globalization in the form of liberalized flows of trade capital and labor and globalization as a force for the creation of transnational and superterritorial entities and allegiances These volumes examine how each of these facets of globalization affects American government law business economy society and culture

Peasants and Globalization A. Haroon

Akram-Lodhi, Cristóbal Kay, 2012-08-21 In 2007 for the first time in human history a majority of the world's population lived in cities. However, on a global scale, poverty overwhelmingly retains a rural face. This book assembles an unparalleled group of internationally eminent scholars in the field of rural development and social change in order to explore historical and contemporary processes of agrarian change and transformation and their consequent impact upon the livelihoods, poverty, and well-being of those who live in the countryside. The book provides a critical analysis of the extent to which rural development trajectories have in the past and are now promoting a change in rural production processes, the accumulation of rural resources, and shifts in rural politics and the implications of such trajectories for peasant livelihoods and rural workers in an era of globalization. *Peasants and Globalization* thus explores continuity and change in the debate on the agrarian question from its early formulation in the late 19th century to the continuing relevance it has in our times, including chapters from Terence Byres, Amiya Bagchi, Ellen Wood, Farshad Araghi, Henry Bernstein, Saturnino M. Borrás, Ray Kiely, Michael Watts, and Philip McMichael. Collectively, the contributors argue that neoliberal social and economic policies have, in deepening the market imperative governing the contemporary world food system, not only failed to tackle the underlying causes of rural poverty but have indeed deepened the agrarian crisis currently confronting the livelihoods of peasant farmers and rural workers. This crisis does not go unchallenged, as rural social movements have emerged for the first time on a transnational scale. Confronting development policies that are unable to reduce, let alone eliminate, rural poverty, transnational rural social movements are attempting to construct a more just future for the world's farmers and rural workers.

Mustafa Erdoğan, Olanrewaju Adewole, Adediran, Renáta Halásková, Martina Halásková, David Slavata, Berna Ak Bingül, Rengin Ak, Burak Kahraman, Fatih Kahraman, Mehtap Tosun, Esra Köten Peker, 2012 As the outcome of the third international conference of political economy, the papers in this volume cover a range of topics related to the conference theme of labor markets and employment from globalization to migration, unionization to policy implementation, and women's labor to child labor and ethnic issues in employment. Despite the wide range they come from, almost all papers draw attention to the radical changes in employment policies and practices around the world, and many of them point to global neoliberalism as the source of this transformation process, one way or another. We believe that revealing the dynamics of this process and putting forward

possible alternative policies and practices across the world would provide significant contribution to solving the problems of labor markets and employment as the papers in this collection attempt to do
