US Health: A Failed System: Liaropoulos, Lykourgos, 2016-10-29 Health has been one of the most frequent issues arising in the Social Policy debate for the last 60 or more years The answers given vary according to political ideology economic expediency and the moral standing of individuals and society The sources of funding are essentially two either the individual directly or a larger group acting on his behalf In the second case we have two main categories The individual is either covered by private for profit insurance or by a public insurance scheme financed by mandatory employment contributions and or by taxes on income and or wealth The economic implications of each form of health insurance are immense for individuals employers the government and for the economy as a whole The main differentiation is the position of health care in the value system of society If health care is considered a right its financing must be similar to that of other public goods or rights such as justice national security personal safety basic education etc At the same time the provision of all public goods is a public responsibility and government is judged by how well it measures up to this responsibility If on the other hand health care is considered a good bought and sold on the market then it is up to individuals to provide for themselves Obviously this fundamental issue belongs to the sphere of politics and is up to society to judge according to its code of ethics The time to decide has come in America somewhat belatedly but in a way more acute than ever The health of individuals but also and mainly the economic health of the nation depends on the decision

Interactive Political Leadership Eva Sørensen, 2020-01-09 Building on recent theories of interactive governance and political leadership Interactive Political Leadership develops a concept of interactive political leadership and a theoretical framework for studying the role of elected politicians in the age of governance The

purpose of the theoretical framework is to inspire and guide empirical research into how elected politicians perform political leadership in a society where citizens and other stakeholders play an active role in making and implementing political decisions and what barriers challenges and dilemmas they encounter in relation to the performance of interactive political leadership The research framework draws extensively on recent theories of interactive governance and political leadership and other new developments in political science and public administration research Moreover it finds inspiration in current tendencies and embryonic examples of interactive political leadership performed by elected politicians operating at different levels of governance in Western liberal democracies The basic assumption is that political legitimacy is essential for the survival of a political system and that interactive political leadership stands out as a promising way of securing what political scientists denote as input throughput output and outcome legitimacy in the age of governance Hence interactive political leadership aims to establish a bridge between representative democracy and emergent forms of political participation to promote political learning and accountability to strengthen the political entrepreneurship of elected politicians and to advance the political system's implementation capacity through resource mobilization The book develops 20 propositions that sets the agenda for a new and much needed field of empirical research into political leadership in the age of governance
