explores the economic nationalistic political social cultural and psychological triggers for xenophobia and nativism and their impact on an increasingly interconnected and interrelated world In addition to the individual and comparative examination of these triggers the book outlines how they can be decreased or altered and argues that Pan Africanism and the unity of purpose among diverse groups in the western hemisphere is still an ideal to which Africa Latin America and the Caribbean can aspire This book will be of interest to academics in the field of African history African Studies Caribbean and Latin American studies cultural anthropology and comparative sociology Encyclopedia of War Crimes and Genocide Leslie Alan Horvitz, Christopher Catherwood, 2014-05-14 Entries address topics related to genocide crimes against humanity and peace and human rights violations profile perpetrators including Joseph Stalin Pol Pot and Idi Amin and discuss institutions set up to prosecute these crimes in countries around the world **Hearings, Reports and Prints of the House Committee on International Relations** United States. Congress. House. Committee on Foreign Affairs, 1981 **AF Press Clips** , 1984 **Movements for Human Rights** David L. Brunson, Keri Iyall Smith, Brian Gran, 2016-09-07 How do people work together to advance human rights Do people form groups to prevent human rights from being enforced Why In what ways do circumstances matter to the work of individuals collectively working to shape human rights practices Human society is made of individuals within contexts tectonic plates not of the earth's crust but of groups and individuals who scrape and shift as we bump along competing for scarce resources and getting along These movements large and small are the products of actions individuals take in communities within families and legal structures These individuals are able to live longer yet continue to remain vulnerable to dangers arising from the environment substances struggles for power and a failure to understand that in most ways we are the same as our neighbors Yet it is because we live together in layers of diverse communities that we want our ability to speak to be unhindered by others use spirituality to help us understand ourselves and others possess a space and objects that are ours alone and join with groups that share our values and interests including circumstances where we do not know who our fellow neighbor is For this reason sociologists have identified the importance of movements and change in human societies When we

collaborate in groups individuals can change the contours of their daily lives Within this book you will find the building blocks for human rights in our communities To understand why sometimes we enjoy human rights and other times we experience vulnerability and risk sociologists seek to understand the individual within her context Bringing together prominent sociologists to grapple with these questions Movements for Human Rights Locally and Globally offers insights into the ways that people move for and against human rights

Exile within Borders Gabriel Cardona-Fox, 2018-12-24 Twenty years after the introduction of the UN Guiding Principles for the Protection of Internally Displaced Persons very little is known about their effectiveness in altering state behavior towards their displaced populations In this book Gabriel Cardona Fox takes a systematic and global first look at patterns of commitment and compliance with the IDP regime Through the innovative use of statistical analysis on all documented cases of displacement and an in depth case study of Colombia s evolving response towards internal displacement this book identifies the domestic and international forces that drive some states to institute and comply with these guidelines Exile Within Borders fills an important gap in the literature and moves the debate over the regime s effectiveness beyond anecdotal evidence

Indigenous Peoples in International Law S. James Anaya, 2004 In this thoroughly revised and updated edition of the first book length treatment of the subject S James Anaya incorporates references to all the latest treaties and recent developments in the international law of indigenous peoples Anaya demonstrates that while historical trends in international law largely facilitated colonization of indigenous peoples and their lands modern international law s human rights program has been modestly responsive to indigenous peoples aspirations to survive as distinct communities in control of their own destinies This book provides a theoretically grounded and practically oriented synthesis of the historical contemporary and emerging international law related to indigenous peoples It will be of great interest to scholars and lawyers in international law and human rights as well as to those interested in the dynamics of indigenous and ethnic identity

Commitment and Compliance Dinah Shelton, 2003 The studies in this book concern the nature of international law how it is and is not constituted and whether commitments that are legally binding can change the behaviour of states as well as or better than non binding legal norms do
