The author, a long time storytime facilitator, has put together 52 weekly themes plus additional plans for holidays, all with detailed instructions for talking about the theme and choosing the books, crafts, songs, poems, games, and snacks. Each storytime idea is illustrated with photographs of a suggested craft and snack for easy reference. Libraries, bookstores, preschools, and parents alike can use this book to offer themed storytimes that include discussion, literature, art, music, movement, and food. Options are provided for each storytime so the ideas can be used year after year.

Amazingly Easy Puppet Plays Dee Anderson, 1997 What better way to hold children's attention during storytime than with puppets? Even in an age of technical wizardry, clever dialogue, and home made puppets are all it takes to entertain children. Author Dee Anderson has presented puppet skits for sixteen years in libraries, schools, parks, day care centers, a mall, and other community locations. Each of these forty-two scripts has been audience tested, some more than one hundred times. You'll find programming material for ages 18 months to 12 years. A former children's librarian herself, Anderson has created scripts that are accessible and practical for busy librarians and others who work with children.

The Great ABC Search Anna T. Johannson, 1991-10 Children can go on a hunt while learning the letters of the alphabet. Each scene also contains hidden animals and objects for them to find.

Life Sciences Amy Bain, Janet Richer, Janet Weckman, 2001-05-15 Everything you need to create exciting thematic science units can be found in these handy guides. Developed for educators who want to take an integrated approach, these teaching kits contain resource lists, reading selections, and activities that can be easily pulled together for units on virtually any science topic. Arranged by subject, each book lists key scientific concepts for primary, intermediate, and upper level learners and links them to specific chapters where resources for teaching those concepts appear. Chapters identify and describe comprehensive teaching resources, nonfiction, and related fiction; reading selections then detail hands-on science and extension activities that help students learn the scientific method and build learning across the curriculum. A final section helps you locate helpful experiment books and appropriate journals, Web sites, agencies, and related organizations.
