What's Making Our Children Sick? Michelle Perro, Vincanne Adams, 2017 Exploring the links between GM foods glyphosate and gut health With chronic disorders among American children reaching epidemic levels hundreds of thousands of parents are desperately seeking solutions to their children's declining health often with little medical guidance from the experts What's Making Our Children Sick convincingly explains how agrochemical industrial production and genetic modification of foods is a culprit in this epidemic Is it the only culprit No Most chronic health disorders have multiple causes and require careful disentanglement and complex treatments But what if toxicants in our foods are a major culprit one that if corrected could lead to tangible results and increased health Using patient accounts of their clinical experiences and new medical insights about pathogenesis of chronic pediatric disorders taking us into gut dysfunction and the microbiome as well as the politics of food science this book connects the dots to explain our kids ailing health What's Making Our Children Sick explores the frightening links between our efforts to create higher yield cost efficient foods and an explosion of childhood morbidity but it also offers hope and a path to effecting change The predicament we now face is simple Agroindustrial innovation in a previous era hoped to prevent the ecosystem disaster of DDT predicted in Rachel Carson's seminal book in 1962 *Silent Spring* However this industrial agriculture movement has created a worse disaster a toxic environment and consequently a toxic food supply Pesticide use is at an all time high despite the fact that biotechnologies aimed to reduce the need for them in the first place Today these chemicals find their way into our livestock and food crop industries and ultimately onto our plates Many of these pesticides are the modern day equivalent of DDT However scant research exists on the chemical soup of poisons that our children consume on a daily basis As our food supply environment reels under the

pressures of industrialization via agrochemicals our kids have become the walking evidence of this failed experiment What s Making Our Children Sick exposes our current predicament and offers insight on the medical responses that are available both to heal our kids and to reverse the compromised health of our food supply *Islam and Biomedicine* Afifi al-Akiti,Aasim I. JOHANSON,2018-07-01 This book chronicles how since the Neolithic era of the Stone Age agricultural tools evolved from pointed digging sticks to electron microscopes Weeds evolved into wheat carrots and more as humans selected and designed foods People farmed sustainably

since the last Ice Age with fire and fish traps and more recently agriculture has evolved to produce more for a growing worldwide population Learning about problems from the past and the future that agricultural technology is meant to solve will help readers understand how applying critical thinking can change the world Critical Epidemiology and the People's Health Jaime Breilh, 2021 How can we create a more rigorous and effective epidemiology Critical Epidemiology and the People's Health invites readers to the next great paradigm in public health by promoting a progressive transdisciplinary intercultural community building approach one that is radically divergent from the presiding object based empiricist mode of thinking **Grass-Fed Nation** Graham Harvey, 2016-05-05 For years we've been told that traditional foods are unhealthy because of their saturated fat content In place of grass fed meat grass fed dairy products and eggs from hens running on pasture we now mostly eat grain fed meat and processed factory foods and we've witnessed an epidemic of disease from type 2 diabetes to heart disease and cancer Modern agriculture has locked us into an unhealthy vicious circle with degraded foods pouring from an overstretched impoverished landscape There's a simple remedy the grass fed movement We can make sure that the meat dairy foods and eggs we buy come from animals grazing on or running in pasture as they always used to This will also put life back into our soils and wildlife back onto our farmland Graham Harvey agricultural advisor to BBC Radio 4's The Archers lays out all the arguments for grass fed food why it's good for us and why it's good for the planet
