G. Pantelakis, C. A. Rodopoulos, 2009-02-14 Within the last thirty years there is a growing acknowledgement that prevention of catastrophic failures necessitates engagement of a large pool of expertise Herein it is not excessive to seek advice from disciplines like materials science structural engineering mathematics physics reliability engineering and even economics Today's engineering goals independently of size do not have the luxury of being outside a global perspective Survival of the integrated markets and financial systems require a web of safe transportation energy production and product manufacturing It is perhaps the first decade in engineering history that multidisciplinary proaching is not just an idea that needs to materialise but has matured beyond infancy We can witness such transition by examining engineering job descriptions and postgraduate curricula The undertaking of organising a conference to reflect the above was not easy and definitely not something that was brought to life without a lot of work and commitment The 1 Conference of Engineering Against Fracture from its conceptual day until completion was designed in a way of underlying the need of bringing all the key players on a common ground that once properly cultivated can flourish To achieve that the conference themes were numerous and despite their in principle notional differences it was apparent that the attendees established such common ground through argumentation The reader can see this from the variety of research areas reflected by the works and keynote lecturers presented *Mechanical Behaviour of Aluminium Alloys* Ricardo Branco, Filippo Berto, Andrei Kotousov, 2018-12-10

This book is a printed edition of the Special Issue Mechanical Behaviour of Aluminium Alloys that was published in Applied Sciences *Fatigue Design of Aluminum Components and Structures* Maurice L. Sharp, Glenn E. Nordmark, Craig C. Menzemer, 1996 Focusing on the design challenges associated with using aluminum in such fatigue critical applications as highway infrastructures transportation vehicles automotive suspension systems and aircraft and machine parts this reference gives the data and guidelines that mechanical and civil design engineers need to meet these challenges head on
