Markets, Planning and the Moral Economy D. R. Stabile, A. F. Kozak, 2012-01-01

Markets Planning and the Moral Economy examines the rise of the Progressive movement in the United States during the early decades of the 20th century particularly the trend toward increased government intervention in the market system that culminated in the establishment of President Roosevelt's New Deal programs The authors consult writings from politicians business leaders and economists of the time using a variety of historical perspectives to illuminate the conflicting viewpoints that arose as the country struggled to recover from the worst economic downturn in its history This fascinating historical study explores the conflict between what the authors identify as two competing ideologies the market economy whose proponents advocated a hands off approach and a trust in allowing the markets to adjust themselves and the moral economy whose supporters favored a system of government planning and stewardship designed to promote economic fairness Presenting arguments from each side by public figures and intellectuals this book offers the most thorough and complete analysis to date of the new economic discourse that arose during the Progressive movement and remains a vital component of our economic and political discussions today Professors and students of economics political science public policy and history will all find much to admire in this fascinating and accessible volume Scholars from across the world will also find this book helpful in contemplating the long term effects that the tension between the market economy and the moral economy can have on an individual country's economic system *Kindle Touch For Dummies Portable Edition* Leslie H. Roberts,2014-01-10 If you read technology news you ll notice it s not just a story of amazing new product introductions or even that plus copycat product introductions All the usual aspects of business are there fierce competition new contenders old survivors great ideas but business failures mediocre ideas that somehow seem to succeed and prosper As a reporter commentator and blogger on mobile technology I ve collected what

happened in the industry in 2013 and make predictions on what will and won't happen in 2014. You can read what did happen in the mobile technology in 2013. Often I deliver a comment with the news item and usually there is a link to the web page of the original announcement. This way you can dive into any detail level you desire, read my news feed for the overview or follow the related web link to the longer article. History is moving so fast now that it is all recorded electronically but I'm surprised no one else has collected it and presented it for consideration. Here is 2013 from the mobile technology industry for your consideration along with my own observations and opinions about where things are headed. It's often overlooked that the technology industry is an industry. By that I mean its main concerns are profit and growth. As consumers we love the new products and unique abilities we are gaining from technology but it is a business akin to any other trying to seduce us to pry money out of our wallets. So I cover the horse race aspect of the business who's up who's down. Is that changing? Is that likely to change? The longer implications of what the technology industry is doing are vast and social. We are moving to an always on, always connected society where we can communicate with someone instantly and find an answer to any question quickly. The entire database of human knowledge is now available in the palm of your hand whenever you desire it. Everything is there, the good, the bad, right and wrong, hate and love, music and noise. We are obsessed with technology not in and of itself but as a means to an end. Technology is the means to satisfy our curiosity or even our desire for self-expression. We are taking photos machine gun style with our smartphones and choose the few to share. As humans we are gathering ever more data about ourselves and sharing more about ourselves than we probably thought possible. Bill Gates was once asked why the computer industry had generated so much improvement in its products over a relatively few years. He gave some boring answer about Moore's Law but the real answer is that computers are in their teenage years. They are growing and growing. They will not always do so. So too the technology industry is in a state of rapid change. I see the shift to smaller devices as a new paradigm smashing some businesses and growing others into giants. Their stories are here in the news. In short, here are predictions for what won't and will happen in 2014 for the mobile technology industry: breakdowns of marketshare figures on the horse race aspect of the business; chapters on Apple, Samsung, Google, Microsoft, Nokia, Blackberry, Amazon, Yahoo; news about social media giants Facebook, Twitter, Google, LinkedIn, Foursquare, SnapChat; and the carriers themselves Verizon, AT&T, Sprint, and T-Mobile. You can also review my 2013 mobile predictions and see my track record on predictions. Finally, there are some essays on how all this mobile tech is figuring into our lives. I've divided the news into the subjects it covers but also put in the appendix all the news as it came out in chronological ordering. You can read the firehose of events in the appendix or just read about one topic at a time in the earlier chapters.
