Gomez,2000-11-09 The transatlantic slave trade brought individuals from diverse African regions and cultures to a common destiny in the American South In this comprehensive study Michael Gomez establishes tangible links between the African American community and its African origins and traces the process by which African populations exchanged their distinct ethnic identities for one defined primarily by the conception of race He examines transformations in the politics social structures and religions of slave populations through 1830 by which time the contours of a new African American identity had begun to emerge After discussing specific ethnic groups in Africa Gomez follows their movement to North America where they tended to be amassed in recognizable concentrations within individual colonies and later states For this reason he argues it is possible to identify particular ethnic cultural influences and ensuing social formations that heretofore have been considered unrecoverable Using sources pertaining to the African continent as well as runaway slave advertisements ex slave narratives and folklore Gomez reveals concrete and specific links between particular African populations and their North American progeny thereby shedding new light on subsequent African American social formation
