From Airline Reservations to Sonic the Hedgehog Martin Campbell-Kelly, 2004-02-27 A business history of the software industry from the days of custom programming to the age of mass market software and video games From its first glimmerings in the 1950s the software industry has evolved to become the fourth largest industrial sector of the US economy Starting with a handful of software contractors who produced specialized programs for the few existing machines the industry grew to include producers of corporate software packages and then makers of mass market products and recreational software This book tells the story of each of these types of firm focusing on the products they developed the business models they followed and the markets they served By describing the breadth of this industry Martin Campbell Kelly corrects the popular misconception that one firm is at the center of the software universe He also tells the story of lucrative software products such as IBM's CICS and SAP's R/3 which though little known to the general public lie at the heart of today's information infrastructure With its wealth of industry data and its thoughtful judgments this book will become a starting point for all future investigations of this fundamental component of computer history

How to Win Customers in the Digital World Peter Vervest, Al Dunn, 2012-12-06 Every organisation must

strive for Total Action Winning the customer in today's highly competitive and demanding world is the key to ensuring success. All managers and employees profess to understand this yet they find it incredibly difficult to perform together to achieve this. The digital world is changing the traditional logic of business; we must now act fast and effectively to capture and retain increasingly demanding and sophisticated customers, be they individuals or organisations. Most customers demand much more than many organisations are able to deliver. It is said that the inventor of the telephone believed its main use would be to let someone know that a telegram was arriving. Today we know there is a lot more you can do with a telephone and all the surrounding digital business technologies. But you must be prepared to re-think why you are doing things the way you are and why you are doing them at all. This is the starting point for How to win customers in the digital world. Total Action or Fatal Inaction. The authors confront traditional ways of organising with the capabilities of the new digital business technologies. They are critical of the frozen behaviour of today's large organisations. They go back to the fundamental goal that business is about making money by satisfying customers. Mastering the Travel Intermediaries Ben Vinod, 2024-06-25

This book chronicles the role of travel intermediaries, global distribution systems (GDS), travel management companies (TMC) and online travel agencies (OTA) in the distribution of travel products. The book covers the historical development of these intermediaries and explores their current state and future prospects. Almost six decades after the introduction of computerized reservations systems and four decades after the introduction of Global Distribution Systems that allowed travel agents to make automated airline bookings, the distribution of air products is amid a major transition. A fundamental change is pricing power which shifts from the GDSs to the airlines for the indirect channel. These changes are driven by advancements in technology, market economics and airline cost controls leading to the emergence of new revenue models that will permanently alter the landscape of air distribution. As a result, travel intermediaries are experiencing the effects of these turbulent times and must adopt innovative approaches and initiatives to adapt and transform their business models rather than maintaining the status quo. In addition to the ongoing transformation over the next decade, the advancements in emerging technologies like blockchain and decentralized digital identity will further revolutionize the distribution landscape across all sectors of the travel industry. **An Investigation into the Detection and Mitigation of Denial of Service (DoS) Attacks** S.V.
