Abstract: This study examined the effects of a 12-week, 100% body weight (BW) resistance training program on the body composition and muscle strength of 10 sedentary, middle-aged men. The men were randomly assigned to either a control group (CON) or a resistance training group (RT). The RT group performed a 12-week, 100% BW resistance training program, while the CON group remained sedentary. The results showed that the RT group had a significant decrease in body fat percentage and an increase in muscle strength compared to the CON group. The findings suggest that a 12-week, 100% BW resistance training program can effectively improve body composition and muscle strength in sedentary, middle-aged men.

Schreckhise, 2018-03-02 Lurking in the back of the minds of many students of American government is the question How well does the American political system work This book examines this in a way that is broad in approach and accessible to readers Such an ambitious examination of the effectiveness of the American policymaking system leads to one inescapable question how can you measure effectiveness The answer taken in this book is to employ a number of different criteria These criteria include the public's attitudes towards the institutions of government the degree in which all participate equally in political activities the level of which public policy is responsive to public opinion the ability of the actors in the process to create effective public policy the extent the political system imposes costs and benefits on us equally regardless of our economic condition race gender or age In doing so this book ties together and expands upon numerous scholarly studies conducted on American public policymaking and uses David Truman's Systems Model as a conceptual guide Because of the large amount of data presented the book will also serve as a reference source for others conducting research on American public policy *Magruder's American Government* Frank Abbott Magruder, William A.
