The Psychoanalytic Process Joseph Weiss,1986-10-07 In this landmark volume already acclaimed as certain to become a milestone in the history of psychoanalysis and ego psychology Joseph Weiss theory of the psychotherapeutic process is presented and supported by the systematic quantitative research carried out by Sampson Weiss and the Mount Zion Psychotherapy Research Group This remarkable work delineates clear cut implications for doing therapy and for conceptualizing the therapeutic process The theory extends and develops concepts that Freud introduced in his later writings It assumes that psychopathology stems from certain grim unconscious pathogenic beliefs that the patient acquires by inference from early traumatic experiences The patient suffers unconsciously from these beliefs and the feelings of guilt shame and remorse that stem from them He is therefore powerfully motivated unconsciously to change them Moreover the patient is able to exert considerable control over unconscious mental life and indeed to make and carry out unconscious plans He works unconsciously throughout his treatment to change pathogenic beliefs both by testing them in relation to the analyst and by using insights conveyed by the analyst s interpretations Since the theory is close to observation it enables the clinician to monitor the patient s progress to understand throughout the treatment how the patient improves or is set back by the analyst s interventions The quantitative empirical research presented bears directly on this theory It offers strong evidence that the patient exerts control over the emergence of previously repressed mental contents bringing them to consciousness when he unconsciously decides he may safely experience them Supporting the hypothesis that the patient tests pathogenic beliefs throughout treatment in an effort to disconfirm them it shows that the patient is very likely to respond favorably to interpretations that he can use in his struggle to disconfirm his pathogenic beliefs but unfavorably to
