Automated Essay Scoring Mark D. Shermis, Jill C. Burstein, 2003-01-30 This new volume is the first to focus entirely on automated essay scoring and evaluation. It is intended to provide a comprehensive overview of the evolution and state of the art of automated essay scoring and evaluation technology across several disciplines including education testing and measurement, cognitive science, computer science, and computational linguistics. The development of this technology has led to many questions and concerns. Automated Essay Scoring attempts to address some of these questions including: How can automated scoring and evaluation supplement classroom instruction? How does the technology actually work? Can it improve students' writing? How reliable is the technology? How can these computing methods be used to develop evaluation tools? What are the state-of-the-art essay evaluation technologies and automated scoring systems? Divided into four parts, the first part reviews the teaching of writing and how computers can contribute to it. Part II analyzes actual automated essay scorers including e-rater™, Intellimetric, and the Intelligent Essay Assessor. The third part analyzes related psychometric issues, and the final part reviews innovations in the field. This book is ideal for researchers and advanced students interested in automated essay scoring from the fields of testing and measurement, education, cognitive science, language, and computational linguistics.

Making Sense of Human Anatomy and Physiology Earle Abrahamson, Jane Langston, 2017-10-17 Designed to be user-friendly and informative for both students and teachers, this book provides a road map for understanding problems and issues that arise in the study of anatomy and physiology. Students will find tips to develop specific study skills that lead to maximum understanding and retention. They will learn strategies not only for passing an examination or assessment but also for permanently retaining the fundamental building blocks of anatomical study and application. For the teacher and educator, the book provides useful insight into practical and effective assessment techniques, explores the subject matter from a learning approach perspective, and considers different methods of teaching to best convey the message and meaning of anatomy and physiology. Supported by clear diagrams and illustrations, this is a key text for teachers who want a useful toolbox of creative techniques and ideas that will enhance the learning experience. In addition to the wealth of information it provides, *Making Sense of Human Anatomy and Physiology* sets in place a bedrock of learning skills for future study, regardless of the subject. Students of beauty therapies, holistic and complementary therapies, and fitness professionals, yoga teachers, personal trainers, sports coaches, and dance teachers will gain not only a basic understanding of anatomy and physiology but also the skills to learn such a subject. Allied professionals in nursing, biomedical science, dentistry, occupational therapy, physiotherapy, midwifery, zoology, biology, and veterinary science will also find this book an invaluable resource. The final chapters offer suggestions for the further exploration of concepts, assessment, learning activities, and applications.
