

Unit: Chemical Bonding Answer Key "Covalent Bonding" - WS #3

Directions: Please answer each question using your notes from today's class. ☺

1. What is the difference between a molecular formula, structural formula and an electron dot formula? Give an example of each.

A molecular formula gives the chemical make-up of one molecule. It does not show atom-to-atom connectivity. Example: C_3H_8

A structural formula uses lines instead of dots to show shared pairs of electrons.

Example: $H-H$

An electron dot formula uses dots instead of lines to show shared pairs of electrons.

Example: $H:H$

2. What is the difference between single, double, and triple covalent bonds? How many shared electrons are in each?

The difference between the types of bonds is: a single bond is two shared electrons, a double is four shared electrons, and a triple is six shared electrons.

3. Draw the electron dot and structural formulas for the following molecules.

Substance	Rough copy (work!)	Electron dot	Structural
a) Cl_2		<i>Note: The electron dot structures have dots in between each atom instead of lines.</i>	$:\ddot{Cl}-\ddot{Cl}:$
b) H_2S			$\begin{array}{c} :\ddot{S}: \\ \\ H \end{array} - H$
c) BrI			$:\ddot{I}-\ddot{Br}:$

Music of Life Stanislav Tregub, 2020-08-08 Based on the Theory of Energy Harmony developed in the first two volumes of the series this book builds bridges between physical and life sciences It tackles fundamental questions that are considered the main riddles of biology How do the four elements of non living matter form the basic structures of living matter What is the physical mechanism that binds them into biochemical molecules The proposed model proceeds from the assumption that there are no special biophysical laws and the mechanism of energy interactions is universal for all types of matter The elements that form organic compounds have characteristics that allow them to create the Music of Life using this mechanism Starting from a detailed account of how notes of this music arise the book takes the reader step by step into the intricacies of the complex melodies harmonies and rhythms of living matter By

answering fundamental questions about non animate and animate Matter the author paves the way to answering fundamental questions about the Mind These questions are easy to formulate What is it What does it do Why does it do it How does it do it However they are not easily answerable from a physical perspective which is the only perspective science can take Many people argue that the mission is impossible and explain the Mind away by proclaiming that it is non physical and thus inaccessible for scientific study The author shows that the lack of explanation is only due to cognitive science remaining at the phenomenological level of study It only describes the observed physiological phenomena and their mental outcomes leaving an explanatory gap between them However as in physics causal explanation is the ultimate task in cognitive science We should uncover the mechanism that works in living systems and produces the mental phenomena we combine in the word Mind In this volume the author builds the foundation for the theory of the Mind developed in the following parts of the Symphony of Matter and Mind project

Nourishment Fred Provenza, 2018 Reflections on feeding body and spirit in a world of change Animal scientists have long considered domestic livestock to be too dumb to know how to eat right but the lifetime research of animal behaviorist Fred

Provenza and his colleagues has debunked this myth Their work shows that when given a choice of natural foods livestock have an astoundingly refined palate nibbling through the day on as many as fifty kinds of grasses forbs and shrubs to meet their nutritional needs with remarkable precision In *Nourishment* Provenza presents his thesis of the wisdom body a wisdom that links flavor feedback relationships at a cellular level with biochemically rich foods to meet the body's nutritional and medicinal needs Provenza explores the fascinating complexity of these relationships as he raises and answers thought provoking questions about what we can learn from animals about nutritional wisdom What kinds of memories form the basis for how herbivores and humans recognize foods Can a body develop nutritional and medicinal memories in utero and early in life Do humans still possess the wisdom to select nourishing diets Or has that ability been hijacked by nutritional authorities Consumers eager for a quick fix have empowered the multibillion dollar a year supplement industry but is taking supplements and enriching and fortifying foods helping us or is it hurting us On a broader scale Provenza explores the relationships among facets of complex poorly understood ever changing ecological social and economic systems in light of an unpredictable future To what degree do we lose contact with life sustaining energies when the foods we eat come from anywhere but where we live To what degree do we lose the mythological relationship that links us physically and spiritually with Mother Earth who nurtures our lives Provenza's paradigm changing exploration of these questions has implications that could vastly improve our health through a simple change in the way we view our relationships with the plants and animals we eat Our health could be improved by eating biochemically rich foods and by creating cultures that know how to combine foods into meals that nourish and satiate Provenza contends the voices of authority disconnect most people from a personal search to discover the inner wisdom that can nourish body and spirit That journey means embracing wonder and uncertainty and avoiding illusions of stability and control as we dine on a planet in a universe bent on consuming itself *GATE*
