Ancestral Appetites Food In Prehistory:

Ancestral Appetites Kristen J. Gremillion, 2011-03-14 This book explores the relationship between prehistoric people and their food what they ate why they ate it and how researchers have pieced together the story of past foodways from material traces Contemporary human food traditions encompass a seemingly infinite variety but all are essentially strategies for meeting basic nutritional needs developed over millions of years Humans are designed by evolution to adjust our feeding behaviour and food technology to meet the demands of a wide range of environments through a combination of social and experiential learning In this book Kristen J Gremillion demonstrates how these evolutionary processes have shaped the diversification of human diet over several million years of prehistory She draws on evidence extracted from the material remains that provide the only direct evidence of how people procured prepared presented and consumed food in prehistoric times

International Handbook of Food Studies Ken Albala, 2013-05-07 Over the past decade there has been a remarkable flowering of interest in food and nutrition both within the popular media and in academia Scholars are increasingly using foodways food systems and eating habits as a new unit of analysis within their own disciplines and students are rushing into classes and formal degree programs focused on food Introduced by the editor and including original articles by over thirty leading food scholars from around the world the Routledge International Handbook of Food Studies offers students scholars and all those interested in food related research a one stop easy to use reference guide Each article includes a brief history of food research within a discipline or on a particular topic a discussion of research methodologies and ideological or theoretical positions resources for research including archives grants and fellowship opportunities as well as suggestions for further study Each entry also explains the logistics of succeeding as a student and professional in food studies This clear direct Handbook will appeal to those hoping to start a career in academic food studies as well as those hoping to shift their research to a food related project Strongly interdisciplinary this work will be of interest to students and scholars throughout the social sciences and humanities

Women's Food Matters Vicki A. Swinbank, 2021-04-16 Women have always been inextricably linked to food especially in its production and preparation This link which applies cross culturally has seldom been fully acknowledged or celebrated The role of women in this is usually taken for granted and therefore often rendered unimportant or invisible This book presents a wide ranging interdisciplinary and comprehensive feminist analysis of women s

central role in many aspects of the world's food systems and cultures. This central role is examined through a range of lenses, namely cross-cultural, intergenerational, and socially diverse. **Food: An Insightful Exploration** Vinod Huria, 2024-12-28

Critical Social Challenges in the Tourism Industry: Labor, Commodification, and Drugs is a groundbreaking book that delves into the often overlooked critical issues within the field of tourism. The book adopts a critical perspective, shedding light on power relations, domination, and oppression within the tourism industry. By exposing these dynamics, the critical paradigm seeks to liberate both tourist destinations and employees from exploitative conditions. From examining the social and environmental effects of tourism to addressing critical topics such as gentrification, consumerism, commodification, and critical pedagogy, this comprehensive study offers a fresh and thought-provoking analysis of the field. With a focus on labor transformation, the formation of the working class, and the employment of women, children, and immigrants, the book uncovers the intricate labor processes and interactions within the tourism industry. Furthermore, it explores important aspects such as tourist-employee interaction, LGBT tourism, illegal sex tourism, and the use of drugs and psychedelics in the context of tourist mobility. This book is ideal for researchers and students in the field of tourism, offering a comprehensive examination of critical issues within the industry. **Tuckaleechee Cove** Boyce N. Driskell, Robert J. Norrell, 2024-01-12

Tuckaleechee Cove Nestled amid the western slopes of the Great Smoky Mountains in East Tennessee, bisected by the Little River and including the community of Townsend, Tuckaleechee Cove is known today as the peaceful side of the Smokies. Celebrated for its natural beauty, the area is also the site of human habitation dating back at least 13,000 years. Tuckaleechee Cove's rich past emerged from years of archaeological and historical research that began in 1999 when a state highway project uncovered a wealth of Native American and Euro American remains, including burial mounds, fragments of tools, weapons, cooking vessels, and other evidence of past activity. This beautifully illustrated book combines details from that study with fascinating bits of history to tell the story of the cove and its disparate peoples. The earliest Native Americans to visit the area were hunters and foragers who moved in small bands through the cove, setting up

temporary camps Over the millennia foraging gave way to more settled farming practices with the establishment of permanent settlements about 2 000 years ago By the 1600s the area s residents were Cherokees who would soon encounter European explorers and traders Displacing the Cherokees Euro Americans formed a number of small communities in the cove with colorful names like Frog Town and Needmore They farmed the land built churches schools and small businesses and fought in the Civil War In 1900 a northern investor named W B Townsend recognized the area s potential as a source of timber and two years later the town bearing his name was literally abuzz with sawmill activity By the Great Depression however the mills had closed bringing hardship to cove residents A measure of relief came in 1934 when the Great Smoky Mountains National Park was established nearby opening a new still unfolding chapter in the area s history Boyce N Driskell is the past director of the Archaeological Research Laboratory and adjunct research professor in the Department of Anthropology at the University of Tennessee Knoxville Robert J Norrell is a professor and the Bernadotte Schmidt Chair of Excellence in the Department of History at the University of Tennessee Knoxville

Ancient Ocean Crossings Stephen C. Jett, 2017-06-06 Paints a compelling picture of impressive pre Columbian cultures and Old World civilizations that contrary to many prevailing notions were not isolated from one another In Ancient Ocean Crossings Reconsidering the Case for Contacts with the Pre Columbian Americas Stephen Jett encourages readers to reevaluate the common belief that there was no significant interchange between the chiefdoms and civilizations of Eurasia and Africa and peoples who occupied the alleged terra incognita beyond the great oceans More than a hundred centuries separate the time that Ice Age hunters are conventionally thought to have crossed a land bridge from Asia into North America and the arrival of Columbus in the Bahamas in 1492 Traditional belief has long held that earth s two hemispheres were essentially cut off from one another as a result of the post Pleistocene meltwater fed rising oceans that covered that bridge The oceans along with arctic climates and daunting terrestrial distances formed impermeable barriers to interhemispheric communication This viewpoint implies that the cultures of the Old World and those of the Americas

developed independently Drawing on abundant and concrete evidence to support his theory for significant pre Columbian contacts Jett suggests that many ancient peoples had both the seafaring capabilities and the motives to cross the oceans and in fact did so repeatedly and with great impact His deep and broad work synthesizes information and ideas from archaeology geography linguistics climatology oceanography ethnobotany genetics medicine and the history of navigation and seafaring making an innovative and persuasive multidisciplinary case for a new understanding of human societies and their diffuse but interconnected development

Apes and Human Evolution Russell H. Tuttle, 2014-02-17 Russell Tuttle synthesizes a vast literature in primate evolution and behavior to explain how apes and humans evolved in relation to one another and why humans became a bipedal tool making culture inventing species distinct from other hominoids He refutes the theory that we are sophisticated instinctively aggressive and destructive killer apes

Ceramics, Cuisine and Culture Michela Spataro, Alexandra Villing, 2015-10-31 The 23 papers presented here are the product of the interdisciplinary exchange of ideas and approaches to the study of kitchen pottery between archaeologists material scientists historians and ethnoarchaeologists They aim to set a vital but long neglected category of evidence in its wider social political and economic contexts Structured around main themes concerning technical aspects of pottery production cooking as socioeconomic practice and changing tastes culinary identities and cross cultural encounters a range of social economic and technological models are discussed on the basis of insights gained from the study of kitchen pottery production use and evolution Much discussion and work in the last decade has focussed on technical and social aspects of coarse ware and in particular kitchen ware The chapters in this volume contribute to this debate moving kitchen pottery beyond the Binfordian technomic category and embracing a wider view linking processualism ceramic ecology behavioral schools and ethnoarchaeology to research on historical developments and cultural transformations

covering a broad geographical area of the Mediterranean region and spanning a long chronological sequence **Culinary Turn** Nicolaj van der Meulen, Jörg Wiesel, Raphaela Reinmann, 2017-04-15 Kitchen cooking nutrition and eating have become omnipresent cultural topics They stand at the center of design gastronomy nutrition science and agriculture Artists have appropriated cooking as an aesthetic practice in turn cooks are adapting the staging practices that go with an artistic self image This development is accompanied by crisis of eating behaviour and a philosophy of cooking as a speculative cultural technique This volume investigates the dimensions of a new culinary turn combining for the very first time contributions from the theory and practice of cooking *Abundance* Monica L. Smith, 2017-06-15 Using case studies from around the globe including Mesoamerica North and South America Africa China and the Greco Roman world and across multiple time periods the authors in this volume make the case that abundance provides an essential explanatory perspective on ancient peoples choices and activities Economists frequently focus on scarcity as a driving principle in the development of social and economic hierarchies yet focusing on plenitude enables the understanding of a range of cohesive behaviors that were equally important for the development of social complexity Our earliest human ancestors were highly mobile hunter gatherers who sought out places that provided ample food water and raw materials Over time humans accumulated and displayed an increasing quantity and variety of goods In households shrines tombs caches and dumps archaeologists have discovered large masses of materials that were deliberately gathered curated distributed and discarded by ancient peoples The volume s authors draw upon new economic theories to consider the social ideological and political implications of human engagement with abundant quantities of resources and physical objects and consider how individual and household engagements with material culture were conditioned by the quest for abundance Abundance shows that the human propensity for mass consumption is not just the result of modern production capacities but fulfills a longstanding focus on plenitude as both the assurance of well being and a buffer against uncertainty This book will be of great interest to scholars and students in economics anthropology and cultural studies Contributors Traci Ardren Amy Bogaard Elizabeth Klarich Abigail Levine Christopher R Moore Tito E Naranjo Stacey Pierson James M Potter Fran ois G Richard Christopher W Schmidt Carol Schultze Payson Sheets Monica L Smith Katheryn C Twiss Mark D Varien Justin St P Walsh Mar a Nieves Zede o *The Prehistory of Food* Chris Gosden, Jon G. Hather, 2004-01-14 The Prehistory of Food sets subsistence in its social context by focusing on food as a cultural artefact It brings together contributors with a scientific and biological expertise as well as those interested in the patterns of consumption and social change and includes a wide range of case studies **The Archaeology of Caribbean and Circum-Caribbean Farmers (6000 BC - AD 1500)** Basil Reid, 2018-05-16 Comprising 17 chapters and with a wide geographic reach stretching from the Florida Keys in the north to the Guianas in the south this volume places a well needed academic spotlight on what is generally considered an integral topic in Caribbean and circum Caribbean archaeology The book explores a variety of issues including the introduction and dispersal of early cultivars plant

manipulation animal domestication dietary profiles and landscape modifications Tried and true and novel analytical techniques are used to tease out aspects of the Caribbean and circum Caribbean database that inform the complex and often subtle processes of domestication under varying socio environmental conditions Contributors discuss their findings within multiple constructs such as neolithisation social interaction trade mobility social complexity migration colonisation and historical ecology Multiple data sources are used which include but are not restricted to rock art cooking pits and pots stable isotopes dental calculus and pathologies starch grains and proxies for past environmental conditions Given its multi disciplinary approaches this volume should be of immense value to both researchers and students of Caribbean archaeology biogeography ethnobotany zooarchaeology historical ecology agriculture environmental studies history and other related fields
