book was designed to provide and encourage practitioner s development and use of critical drug information evaluation skills
through a deeper understanding of the foundational principles of study design and statistical methods Because guidance on
how a study s limited findings should not be used is rare practitioners must understand and evaluate for themselves the
veracity and implications of the inherently limited primary literature findings they use as sources of drug information to
make evidence based decisions together with their patients The editors organized the book into three supporting sections to
meet their pedagogical goals and address practitioners needs in translating research into practice Thanks to the editors
