MENC Handbook of Research on Music Learning: Volume 1: Strategies Richard Colwell, Peter R. Webster, 2011-10-26 The MENC Handbook of Research on Music Learning Volume 1 Strategies brings together the best and most current research on methods for music learning focusing squarely on the profession's empirical and conceptual knowledge of how students gain competence in music at various ages and in different contexts The collection of chapters written by the foremost figures active in the field takes a broad theoretical perspective on current critical areas of research including music development music listening and reading motivation and self-regulated learning in music music perception and movement The book's companion volume Applications builds an extensive and solid position of practice upon the frameworks and research presented here Throughout both volumes in this essential set focus is placed on the musical knowledge and musical skills needed to perform create understand reflect on enjoy value and respond to music A key point of emphasis rests on the relationship between music learning and finding meaning in music and as music technology plays an increasingly important role in learning today chapters move beyond exclusively formal classroom instruction into other forms of systematic learning and informal instruction Either individually or paired with its companion Volume 2 Applications this indispensable overview of this growing area of inquiry will appeal to students and scholars in Music Education as well as front-line music educators in the classroom

The New Handbook of Research on Music Teaching and Learning Richard Colwell, Carol Richardson, 2002-04-18 Featuring chapters by the world's foremost scholars in music education and cognition this handbook is a convenient collection of current research on music teaching and learning This comprehensive work includes sections on arts advocacy music and medicine teacher education and studio instruction among other subjects making it an essential reference for music education programs The original Handbook of Research on Music Teaching and Learning published in 1992 with the sponsorship of the Music Educators National Conference MENC was hailed as a welcome addition to the literature on music education because it serves to provide definition and unity to a broad and complex field Choice This new companion volume again with the sponsorship of MENC explores the significant changes in music and arts education that have taken place in the last decade Notably several chapters now incorporate insights from other fields to shed light on multi-cultural music education gender issues in music education and non-musical outcomes of music education Other chapters offer practical information on maintaining musicians' health training music teachers and evaluating music education programs Philosophical issues such as musical cognition the philosophy of research theory curriculum and educating musically are also explored in relationship to policy issues In addition to surveying the literature
