**Teaching and Learning Secondary School Mathematics** Ann Kajander, Jennifer Holm, Egan J Chernoff, 2018-10-24

This volume brings together recent research and commentary in secondary school mathematics from a breadth of contemporary Canadian and International researchers and educators. It is both representative of mathematics education generally as well as unique to the particular geography and culture of Canada. The chapters address topics of broad applicability such as technology in learning mathematics, recent interest in social justice contexts in the learning of mathematics as well as Indigenous education. The voices of classroom practitioners, the group ultimately responsible for implementing this new vision of mathematics teaching and learning, are not forgotten. Each section includes a chapter written by a classroom teacher, making this volume unique in its approach. We have much to learn from one another, and this volume takes the stance that the development of a united vision supported by both research and professional dialog provides the first step.

**Get Better Faster** Paul Bambrick-Santoyo, 2016-07-25. Effective and practical coaching strategies for new educators plus valuable online coaching tools. Many teachers are only observed one or two times per year on average, and even among those who are observed, scarcely any are given feedback as to how they could improve. The bottom line is clear: teachers do not need to be evaluated so much as they need to be developed and coached. In *Get Better Faster: A 90 Day Plan for Coaching New Teachers*, Paul Bambrick-Santoyo shares instructive tools of how school leaders can effectively guide new teachers to success. Over the course of the book, he breaks down the most critical actions leaders and teachers must take to achieve exemplary results. Designed for coaches as well as beginning teachers, *Get Better Faster* is an integral coaching tool for any school leader eager to help their teachers succeed. *Get Better Faster* focuses on what's practical and actionable, which makes the book's approach to coaching so effective. By practicing the concrete actions and micro skills listed in *Get Better Faster*, teachers will markedly improve their ability to lead a class, producing a steady chain reaction of future teaching success. Though focused heavily on the first 90 days of teacher development, it's possible to implement this work at any time. Junior and experienced teachers alike can benefit from the guidance of *Get Better Faster* while, at the same time, closing existing instructional gaps. Featuring valuable and practical online training tools available at <http://www.wiley.com/go/getbetterfaster>, *Get Better Faster* provides agendas, presentation slides, a coach's guide, handouts, planning templates, and 35 video clips of real teachers at work to help other educators apply the lessons learned in their own classrooms. *Get Better Faster* will teach you the core principles of coaching: Go Granular, Plan Practice, Follow Up, Repeat, Make Feedback More Frequent. Top action steps to launch a teacher's development in an easy-to-read scope and sequence guide. It also walks you through the four phases of skill building: Phase 1 Pre-Teaching Dress Rehearsal, Phase 2 Instant Immersion, Phase 3 Getting into Gear, Phase 4 The Power of Discourse. Perfect for new educators and those who supervise them, *Get Better Faster* will also earn a place in the libraries of veteran teachers and school administrators seeking a one-stop coaching resource. **Olympiad Champs**

Invisible Forces Pei Pei Liu, 2023-12-01 Explores the critical role that classroom educators play in supporting student motivation throughout the transition from high school to college. Educators consistently identify student motivation as a top concern, particularly during the transition to college, but often feel helpless to influence it. Some assume that students are simply motivated or not. Others are daunted by trying to shape an unobservable psychological phenomenon. Invisible Forces provides a framework for thinking of student motivation as a set of internal mindsets that are promoted or thwarted through a complex ecology of personal, classroom, institutional, and systemic factors. Using the method of portraiture, Pei Pei Liu brings this ecology to life. The book presents a series of four rich case studies of educators' efforts to support student motivation and the challenges they encounter in secondary and postsecondary writing classrooms. Attuned to the unique status of writing-based courses as a near-universal academic experience throughout the transition from high school to college, these portraits shed light on different strategies, make a case for institutional support of instructors, and pave the way for greater alignment between secondary and postsecondary settings.
