Applied Rasch Measurement: A Book of Exemplars Sivakumar Alagumalai, David D. Curtis, Njora Hungi, 2006-03-30 While the primary purpose of the book is a celebration of John's contributions to the field of measurement a second and related purpose is to provide a useful resource We believe that the combination of the developmental history and theory of the method the examples of its use in practice some possible future directions and software and data files will make this book a valuable resource for teachers and scholars of the Rasch method This book is a tribute to Professor John P Keeves for the advocacy of the Rasch model in Australia Happy 80th birthday John xii There are good introductory texts on Item Response Theory Objective Measurement and the Rasch model However for a beginning researcher keen on utilising the potentials of the Rasch model theoretical discussions of test theory and associated indices do not meet their pragmatic needs Furthermore many researchers in measurement still have little or no knowledge of the features of the Rasch model and its use in a variety of situations and disciplines This book attempts to describe the underlying axioms of test theory and in particular the concepts of objective measurement and the Rasch model and then link theory to practice We have been introduced to the various models of test theory during our graduate days It was time for us to share with those keen in the field of measurement in education psychology and the social sciences the theoretical and practical aspects of objective measurement

Teaching Travel And Tourism 14+ Huggett, Cliff, Pownall, Deborah, 2010-10-01 Teaching Travel and Tourism 14 has been written in response to a perceived need in initial teacher training to address the pedagogy of vocational programmes in the field as a vocational subject. It therefore focuses on theoretical approaches to teaching learning and assessment and how they can inform the way in which we plan and deliver programmes of Travel and Tourism studies. It examines how we teach programmes related to preparation for working in the industry programmes such as the National Diplomas specific professional qualifications and of course the new 14 19 Diplomas. It is intended to inform and stimulate to further study all likely to be involved in the development and delivery of such programmes. This could include those engaged in initial teacher training whether experienced practitioners or post graduate students subject mentors now required to support new teachers experienced teachers unfamiliar with the subject who may be required to teach on these programmes and also administrators needing to familiarise themselves with the nature content and delivery of the subject as an innovation to the curriculum. Therefore although initially it examines the nature of the industry and raises discussion of issues pertinent to the delivery of related vocational programmes it is essentially a useful resource book with a wealth of information about the exciting curriculum opportunities that the subject presents. Through interactive exercises case studies and exemplar resources it provides the reader with a foundation of usable activities to develop a variety of teaching and learning strategies which will enhance their delivery of the Travel and Tourism curriculum.
