Tainted Earth Marianne Sullivan, 2014-01-23 Smelting is an industrial process involving the extraction of metal from ore During this process impurities in ore including arsenic lead and cadmium may be released from smoke stacks contaminating air water and soil with toxic heavy metals The problem of public health harm from smelter emissions received little official attention for much of the twentieth century Though people living near smelters periodically complained that their health was impaired by both sulfur dioxide and heavy metals for much of the century there was strong deference to industry claims that smelter operations were a nuisance and not a serious threat to health It was only when the majority of children living near the El Paso Texas smelter were discovered to be lead exposed in the early 1970s that systematic independent investigation of exposure to heavy metals in smelting communities began Following El Paso an even more serious lead poisoning epidemic was discovered around the Bunker Hill smelter in northern Idaho In Tacoma Washington a copper smelter exposed children to arsenic a carcinogenic threat Thoroughly grounded in extensive archival research Tainted Earth traces the rise of public health concerns about nonferrous smelting in the western United States focusing on three major facilities Tacoma Washington El Paso Texas and Bunker Hill Idaho Marianne Sullivan documents the response from community residents public health scientists the industry and the government to pollution from smelters as well as the long road to protecting public health and the environment Placing the environmental and public health aspects of smelting in historical context the book connects local incidents to national stories on the regulation of airborne toxic metals The nonferrous smelting industry has left a toxic legacy in the United States and around the world Unless these toxic metals are cleaned up they will persist in the environment and may sicken people children in particular for generations to come The

twentieth century struggle to control smelter pollution shares many similarities with public health battles with such industries as tobacco and asbestos where industry supported science created doubt about harm and reluctant government regulators did not take decisive action to protect the public's health *The Aeroplane*, 1924 *Report of the Board of General Officers Appointed to Inquire Into the Statements Contained in the Reports of Sir John M'Neill and Colonel Tulloch, and the Evidence Taken by Them Relative Thereto, Animadverting Upon the Conduct of Certain Officers on the General Staff, and Others in the Army* Great Britain. The Other Quiet Revolution José E. Igartua, 2011-11-01 In the twenty years following the Second World War representations of national identity in anglophone Canada underwent a deep transformation Ethnic definitions of Canadian identity gave way to a rights based concept of citizenship The Other Quiet Revolution traces this under examined cultural transformation woven through key developments in the formation of Canadian nationhood from the 1946 Citizenship Act and the 1956 Suez crisis to the Royal Commission on Bilingualism and Biculturalism 1963 1970 and the adoption of the federal multiculturalism policy in 1971 In this elegant work Jos Igartua analyzes editorial opinion political rhetoric history textbooks and public opinion polls to show how Canada's self conception as a British country extended into the 1950s In the decade that followed however the British definition of Canada dissolved Struggles with bilingualism and biculturalism as well as Quebec's constitutional demands helped to fashion new representations of national identity in English speaking Canada based on the civic principle of equality With its sophisticated conceptual framework and systematic approach to understanding the discourse of Canadian collective identity The Other Quiet Revolution will appeal to readers interested in Canadian identity and nationalism and to general readers of Canadian history *Barium Carbonate from China, Inv. 731-TA-1020 (Preliminary)*, Accounting Theory and Practice Roy Bernard Kester, 1920 Report United States.
