Indian Immigrant Women and Work Ramya Vijaya, Bidisha Biswas, 2016-11-03 In recent years interest in the large group of skilled immigrants coming from India to the United States has soared However this immigration is seen as being overwhelmingly male Female migrants are depicted either as family migrants following in the path chosen by men or as victims of desperation forced into the migrant path due to economic exigencies This book investigates the work trajectories and related assimilation experiences of independent Indian women who have chosen their own migratory pathways in the United States The links between individual experiences and the macro trends of women work immigration and feminism are explored The authors use historical records previously unpublished gender disaggregate immigration data and interviews with Indian women who have migrated to the US in every decade since the 1960s to demonstrate that independent migration among Indian women has a long and substantial history Their status as skilled independent migrants can represent a relatively privileged and empowered choice However their working lives intersect with the gender constraints of labor markets in both India and the US Vijaya and Biswas argue that their experiences of being relatively empowered yet pushing against gender constraints in two different environments can provide a unique perspective to the immigrant assimilation narrative and comparative gender dynamics in the global political economy Casting light on a hidden but steady stream within the large group of skilled immigrants to the United States from India this book will be of interest to researchers in the fields of political economy anthropology and sociology including migration race class ethnic and gender studies as well as Asian studies

Official Gazette of the United States Patent and Trademark Office, 2005

Miseducating for the Global Economy Gerald Coles, 2018-06-26 Reveals that behind the going concern for global economy education lies capitalism's indifference to human values to a fair distribution of resources to its radical restructuring of workplaces with an attendant

intensification of work effort and to the genuine well being of workers and their families Coles provides a real education about the twenty first century global economy and what corporations are doing to prevent our learning about it He describes the intellectually narrow and morally crippling effects of the corporate control of education how the imperative for profit maximizes the misunderstanding of communities nations and the environment even as it minimizes aesthetic appreciation cultural expression compassion itself But it is by understanding all this Coles argues that real change can begin Adapted from publisher description

The Meritocracy Trap Daniel Markovits, 2019-09-10 This book flips your world upside down Daniel Markovits argues that meritocracy isn't a virtuous efficient system that rewards the best and brightest Instead it rewards middle class families who can afford huge investments in their children's education Frightening eye opening stuff The Times Books of the Year Even in the midst of runaway economic inequality and dangerous social division it remains an axiom of modern life that meritocracy reigns supreme and promises to open opportunity to all The idea that reward should follow ability and effort is so entrenched in our psyche that even as society divides itself at almost every turn all sides can be heard repeating meritocratic notions Meritocracy cuts to the heart of who we think we are But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy's successes This is the radical argument that *The Meritocracy Trap* prosecutes with rare force comprehensive research and devastating persuasion Daniel Markovits a law professor trained in philosophy and economics is better placed than most to puncture one of the dominant ideas of our age Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within as well as how we can take the first steps towards a world that might afford us both prosperity and dignity
