2014 Grade 11 March Life Science Question Paper:

The Nutmeg's Curse Amitav Ghosh, 2021-10-14 Do not miss this book NAOMI KLEIN author of *This Changes Everything* The history of the nutmeg is one of conquest and exploitation of both human life and the natural environment and the origin of our contemporary climate crisis Tracing the threats to our future to the discovery of the New World and the sea route to the Indian Ocean *The Nutmeg's Curse* argues that the dynamics of climate change are rooted in a centuries old geopolitical order constructed by Western colonialism The story of the nutmeg becomes a parable revealing the ways human history has always been entangled with earthly materials spices tea sugarcane opium and fossil fuels Our crisis Ghosh shows is ultimately the result of a mechanistic view of the earth where nature exists only as a resource for humans to use for our own ends rather than a force of its own full of agency and meaning Writing against the backdrop of the global pandemic and the Black Lives Matter protests Ghosh frames these historical stories in a way that connects our shared colonial past with the deep inequality we see around us today By interweaving discussions on everything from the global history of the oil trade to the migrant crisis and the animist spirituality of indigenous communities around the world *The Nutmeg's Curse* offers a sharp critique of contemporary society and speaks to the profoundly remarkable ways in which human history is shaped by non human forces **Journal of the National Cancer Institute** ,2014 **Interest in Mathematics and Science**

s most influential feminists Analysing female anger as it relates to topics like self worth objectification pain care fear silence and denial Soraya illuminates how and why we repress our anger revealing the harm that this causes and helping us recognise the liberating power of owning our anger and marshalling it as a vital tool for positive change Just as Quiet brought about a new embrace of introversion Rage Becomes Her will bring about an embrace of feminine anger that will leave women feeling liberated inspired and connected to an entire universe of women who are no longer interested in making nice

Alternative Models of Addiction Hanna Pickard, Serge H. Ahmed, Bennett Foddy, 2015-12-07. For much of the 20th century theories of addictive behaviour and motivation were polarized between two models. The first model viewed addiction as a moral failure for which addicts are rightly held responsible and judged accordingly. The second model in contrast viewed addiction as a specific brain disease caused by neurobiological adaptations occurring in response to chronic drug or alcohol use and over which addicts have no choice or control. As our capacity to observe neurobiological phenomena improved the second model became scientific orthodoxy increasingly dominating addiction research and informing public understandings of addiction. More recently however a dissenting view has emerged within addiction research based partly on new scientific research and partly on progress in philosophical and psychological understandings of relevant mental phenomena. This view does not revert to treating addiction as a moral failure but nonetheless holds that addictive behaviour is fundamentally motivated by choice and subject to at least a degree of voluntary control. On this alternative model of addiction addictive behaviour is an instrumental means to ends that are desired by the individual although much controversy exists with respect to the rationality or irrationality of these ends the degree and nature of the voluntary control of addictive behaviour and motivation the explanation of the difference between addictive and non addictive behaviour and motivation and lastly the extent to which

addictive behaviour and motivation is correctly characterised as pathological or diseased This research topic includes papers in the traditions of neuroscience psychology philosophy law and social science that explore alternative understandings of addiction
