The Two-Parent Privilege Melissa S. Kearney, 2023-09-18 The surprising story of how declining marriage rates are driving many of the country's biggest economic problems In *The Two Parent Privilege* Melissa S. Kearney makes a provocative data driven case for marriage by showing how the institution's decline has led to a host of economic woes problems that have fractured American society and rendered vulnerable populations even more vulnerable Eschewing the religious and values based arguments that have long dominated this conversation Kearney shows how the greatest impacts of marriage are in fact economic when two adults marry their economic and household lives improve offering a host of benefits not only for the married adults but for their children Studies show that these effects are today starker and more unevenly distributed than ever before Kearney examines the underlying causes of the marriage decline in the US and draws lessons for how the US can reverse this trend to ensure the country's future prosperity Based on more than a decade of economic research including her original work Kearney shows that a household that includes two married parents holding steady among upper class adults increasingly rare among most everyone else functions as an economic vehicle that advantages some children over others As these trends of marriage and class continue the compounding effects on inequality and opportunity grow increasingly dire Their effects include not just children's behavioral and educational outcomes but a surprisingly devastating effect on adult men whose role in the workforce and society appears intractably damaged by the emerging economics of America's new social norms For many the two parent home may be an old fashioned symbol of the idyllic American dream But *The Two Parent Privilege* makes it clear that marriage for all its challenges and faults may be our best path to a more equitable future

By confronting the critical role that family makeup plays in shaping children's lives and futures Kearney offers a critical assessment of what a decline in marriage means for an economy and a society and what we must do to change course

- *Using Fiction, Art and Literary Techniques to Communicate* Malcolm McIntosh,Nick Barter,Helen Tregidga,2020-11-29

How can we tell our stories differently How can we go beyond the academic article or sustainability report All reports and all scholarly pieces are narratives of a sort each choosing which evidence suits and each having some sense of beginning middle and end Through their use of fiction art and poetry the seven papers in this Special Issue of The Journal of Corporate Citizenship are challenging what might typically be expected as the form of an academic article These challenges include identifying silent voices linking of our hands hearts and heads via art a poem a napkin to communicate the life of an average academic stories of gladiatorial combat for promotion and a man's day in a non specific future This mix of challenge in both form and message contributes to the ability of the papers to advance understanding and reinforces how an innovative approach to conveying the message can advance debate Measurement in Public Sector Financial Reporting Josette

Caruana,Marco Bisogno,Mariafrancesca Sicilia,2023-03-20 Measurement in Public Sector Financial Reporting presents a constructive and thoughtful analysis of possible valuation methodologies for the public sector context and related peculiarities and critical issues **Contesting Global Environmental Knowledge, Norms and Governance** M. J.

Peterson,2019-01-08 Through theoretical discussions and case studies this volume explores how processes of contestation

about knowledge norms and governance processes shape efforts to promote sustainability through international environmental governance. The epistemic communities literature of the 1990s highlighted the importance of expert consensus on scientific knowledge for problem definition and solution specification in international environmental agreements. This book addresses a gap in this literature: insufficient attention to the multiple forms of contestation that also inform international environmental governance. These forms include within-discipline contestation that helps forge expert consensus; inter-disciplinary contestation regarding the types of expert knowledge needed for effective response to environmental problems; normative and practical arguments about the proper roles of experts and laypersons; and contestation over how to combine globally developed norms and scientific knowledge with locally prevalent norms and traditional knowledge in ways ensuring effective implementation of environmental policies. This collection advances understanding of the conditions under which contestation facilitates or hinders the development of effective global environmental governance. The contributors examine how attempts to incorporate more than one stream of expert knowledge and to include lay knowledge alongside it have played out in efforts to create and maintain multilateral agreements relating to environmental concerns. It will interest scholars and graduate students of political science, global governance, international environmental politics, and global policy making. Policy analysts should also find it useful.
