

7th Grade Throwback

All Year EOG Review

Week 12

Throwback

15 + 9	2) $4\frac{1}{2} + x = 5$
Change $\frac{1}{4}$ to a decimal.	4) $\frac{8}{10} + \frac{1}{5}$
5) Evaluate.	6) Change $\frac{25}{100}$ to a mixed number & simplify.
7) Change 0.45 to a fraction and simplify.	8) Solve for x. $x + 7 = 15$
9) $3^2 + 2(4 + 1)$	10) 1.25(4)

and Fred just turned his

$$\begin{array}{r} - 17.92 \\ + 18.75 \\ \hline - 36.17 \end{array}$$

Identify the error.

A. Forgetful Fred didn't line up decimals.
B. Forgetful Fred added absolute values instead of subtracting them.
C. Forgetful Fred subtracted absolute values instead of adding them.
D. No answer.

What is the scale drawing of a room, the drawing is 6 inches wide. She used feet. What is the actual room?

A. Stanley forgot to "keep them and the opposite" or "keep change change".
B. Stanley shouldn't have kept the negative sign.
C. Stanley didn't line up decimals.
D. There is no error.

24) On Wednesday, 33 students went to after school swimming. On Thursday, 4 students went. What is the percent decrease in the numbers of students who went to swimming?

A. A wholesale company for 35 dollars. How much did he sell the shirt.

11) Let's help Stanley identify his error.

$$\begin{array}{r} - 8.75 - 6.6 \\ \downarrow \\ - 4.75 \\ + - 6.6 \\ \hline - 2.72 \end{array}$$

2014 Nc 7th Grade Eog Review:

Physical Activity, Self-Regulation, and Executive Control Across the Lifespan Sean P. Mullen, Peter Hall, 2016-02-05 There is overwhelming evidence linking increased physical activity with positive changes in cognitive functioning and brain health. Much of what we know about these interrelationships comes from aerobic exercise training studies with older adults and children. This literature has paved the way for the neuroscientific investigation of mechanisms responsible for exercise-induced cognitive and brain health enhancement: a list that ranges from molecular changes to systemic changes in executive control and neural connectivity. A new perspective has also emerged that aims to understand executive control processes that may underlie the regulation of health behavior. In accordance with this view, physical activity falls under the umbrella of health behaviors that require a substantial amount of executive control. Executive control is a limited resource, and the aging process depletes this resource. People who regularly exercise are said to have higher self-regulatory control, planning, goal shielding, and impulse control than irregular exercisers. The successful maintenance of physical activity participation in lieu of daily cognitive stressors likely reflects an adaptive resistance to control failures. Indeed, a handful of studies have shown the relationship between greater executive control and subsequently higher levels of physical activity. However, little is known about the neural correlates of physical activity adherence or sedentary behavior with the view that neurocognitive factors have an antecedent and reciprocal influence on these behaviors. No research has focused on the brain networks responsible for the self-regulation of physical activity, which likely overlaps with structures and functions playing critical roles in the regulation of other health behaviors. Interdisciplinary investigations are needed to explain the extent to which physical activity self-regulation and self-regulatory failure is dependent upon or under the influence of executive control processes and brain networks. Understanding the degree to which self-regulatory resources may be enhanced, restored, and trained will have enormous implications for basic science and applied fields. It is also of great import to understand whether or not physical activity self-regulation is a domain-specific behavior associated with specific brain networks or to determine the extent to which regulatory network sharing occurs. The aim of this Frontiers Research Topic is to curate contributions from researchers in social and cognitive neurosciences and related fields whose work involves the study of physical activity behavior, self-regulation, and executive control. For this Research Topic, we therefore solicit reviews, original research articles, and opinion papers which draw theoretical or empirical connections related to sustained physical activity behavior, self-regulatory strategies, cognitive performance, and brain structure and function. While focusing on work in the neurosciences, this Research Topic also welcomes contributions in the form of behavioral studies, psychophysiological investigations, and methodological innovations. This Frontiers Research Topic will carve out new directions for the fields of exercise, cognitive, and social neurosciences. We hope you will consider submitting your work.

North Carolina 7th Grade EOG Review - Student National Training Network, Incorporated, 2009 **North Carolina 7th Grade EOG Review - Teacher** National

Training Network, Incorporated, 2009 *7th Grade North Carolina EOGs Test Prep* Mark Shannon, 2018-01-19 This test prep is good for kids who are on the fence and having trouble passing or need to increase their margin These kids will often say I DON T KNOW WHERE TO START when explaining their confusion This book address that problem with three approaches 1 In contrast with the other study guides that use random questions in their practice exams this book collated the questions into chapters based on the logic to solve them The 7th grade book is divided into nine chapters They are Logic Arithmetic Geometry Fractions Reading Graphs and tables Measurements including a ruler basic statistics order of operations and Algebra This book teaches basics then goes into practice exams with word problems Once the student is proficient with the questions organized into chapters then they are ready for random questions 2 This study guide has thousands of practice problems I have placed over 3100 videos on YouTube showing you how to work the problems 3 I reviewed several years of past exams and placed enfaces on the easiest and most common questions Mastering these questions should yield a 75% to 80% If a student is already achieving this percentage the other guides or web site with random questions and covering all material might be best A book might be better for your student than the web sites for two reasons 1 The more common and easiest questions are using a ruler to measure The web designers don t know the size of your computer screen and can t determine if the student has measured correctly We can get a high percentage of these problems easily 2 When studying on a computer there are too many websites with the answers With a book parents can have greater assurance the work is being done This book is developed by a trained professional out of concern It is not the product of a large publishing house It is the results of one person who wants to help Best Regards Mark Shannon
