# 2014 November Exam Paper Economics Memo

**Marcus Noland, Donghyun Park**

## **2014 November Exam Papereconomics Memo:**

*Environmental and Natural Resource Economics* Jonathan M. Harris, Brian Roach, 2017-06-26 Environmental issues are of fundamental importance and a broad approach to understanding the relationship of the human economy and the natural world is essential. In a rapidly changing policy and scientific context this new edition of *Environmental and Natural Resource Economics* reflects an updated perspective on modern environmental topics. Now in its fourth edition this book includes new material on climate change, the cost competitiveness of renewable energy, global environmental trends and sustainable economies. The text provides a balanced treatment of both standard environmental economics and ecological economics based on the belief that these two approaches are complementary. Several chapters focus on the core concepts of environmental economics including the theory of externalities, the management of public goods, the allocation of resources across time, environmental valuation and cost benefit analysis. Material on ecological economics includes such topics as macroeconomic scale entropy and green national accounting. Topical chapters focus on energy, climate change, water resources, international trade, forests, fisheries and agriculture with an emphasis on designing effective policies to promote sustainability and a green economy. Harris and Roach's premise is that a pluralistic approach is essential to understand the complex nexus between the economy and the environment. This perspective combined with its emphasis on real world policies is particularly appealing to both instructors and students. This is the ideal text for classes on environmental, natural resource and ecological economics. The book's companion website is available at [http://www.bu.edu/eci/education/materials/textbooks/environmental\\_and\\_natural\\_resource\\_economics](http://www.bu.edu/eci/education/materials/textbooks/environmental_and_natural_resource_economics)

**Challenges to European Welfare Systems** Klaus Schubert, Paloma de Villota, Johanna Kuhlmann, 2016-02-08 This book provides the first comprehensive analyses of the challenges all European welfare systems have been facing since 2007, combining in depth country based studies and comparative chapters. It focuses on 1) the economic and financial crisis, 2) demographic change and 3) the balance between avoiding risks and opening up opportunities in social policy. The results show that European welfare systems tend to face the same challenges in different ways and that also their responses to those challenges differ considerably. Although the EU also plays a part in shaping national welfare systems, it becomes evident that European welfare systems are by no means converging in terms of social policy. National diversity within Europe is still a major factor that will shape future
