2014 November Geography Memo For Grade 12:

Transit States Abdulhadi Khalaf, Omar AlShehabi, Adam Hanieh, 2014-11-20 There are vast swathes of people in economic migration across the Gulf states today In total Saudi Arabia Kuwait Bahrain United Arab Emirates Oman and Qatar form the largest destination for labour migration in the global South This book studies the impact of this mass migration and its effect on citizenship and workers rights Transit States considers how the transitory labour power these workers provide creates an extraordinary development boom that impacts neighbouring countries The majority of the working population is therefore composed of migrant workers with no citizenship rights The Gulf takes a central place in growing debates around migration and labour in the global economy Transit States confronts the precarious working conditions of migrants in an accessible yet in depth manner

On Unemployment Mark R. Reiff, 2015-10-07 With unemployment at historically high rates that show signs of becoming structural there is a pressing need for an in depth exploration of this economic injustice Unemployment is one of the problems most likely to put critical pressure on our political institutions disrupt the social fabric of our way of life and even threaten the continuation of liberalism itself Despite the obvious importance of the problem of unemployment however there has been a curious lack of attention paid to this issue by contemporary non Marxist political philosophers On Unemployment explores the moral implications of the problem of unemployment despite the continuing uncertainty involving both its causes and its cures Reiff takes up a series of questions about the nature of unemployment and what justice has to tell us about what we should do if anything to alleviate it The book comprehensively discusses the related theory and suggests how we might implement these more general observations in the real world It addresses the politics of unemployment and the extent to which opposition to some or all of the book s various proposals stem not from empirical disagreements about the best solutions but from more basic moral disagreements about whether the reduction of unemployment is indeed an appropriate moral goal This exciting new text will be essential for scholars and readers across business economics and finance as well as politics philosophy and sociology

Faith Ed Linda K. Wertheimer, 2015-08-18 An intimate cross country look at the new debate over religion in the public schools A suburban Boston school unwittingly started a firestorm of controversy over a sixth grade field trip The class was visiting a mosque to learn about world religions when a handful of boys unnoticed by their teachers joined the line of worshippers and acted out the motions of the Muslim call to prayer A video of the prayer went viral with the title Wellesley Massachusetts Public School Students Learn to Pray to Allah Charges flew that the school exposed the children to Muslims who intended to convert American schoolchildren Wellesley school officials defended the course but also acknowledged the delicate dance teachers must perform when dealing with religion in the classroom Courts long ago banned public school teachers from preaching of any kind But the question remains How much should schools teach about the world s religions Answering that question in recent decades has pitted schools against their communities Veteran education journalist Linda K Wertheimer spent months with that class and

traveled to other communities around the nation listening to voices on all sides of the controversy including those of clergy teachers children and parents who are Muslim Jewish Christian Sikh or atheist In Lumberton Texas nearly a hundred people filled a school board meeting to protest a teacher s dress up exercise that allowed freshman girls to try on a burka as part of a lesson on Islam In Wichita Kansas a Messianic Jewish family s opposition to a bulletin board display about Islam in an elementary school led to such upheaval that the school had to hire extra security Across the country parents have requested that their children be excused from lessons on Hinduism and Judaism out of fear they will shy away from their own faiths But in Modesto a city in the heart of California s Bible Belt teachers have avoided problems since 2000 when the school system began requiring all high school freshmen to take a world religions course Students receive comprehensive lessons on the three major world religions as well as on Sikhism Hinduism Buddhism and often Shintoism Taoism and Confucianism One Pentecostal Christian girl terrified by idols including a six inch gold Buddha learned to be comfortable with other students beliefs Wertheimer s fascinating investigation which includes a return to her rural Ohio school which once ran weekly Christian Bible classes reveals a public education system struggling to find the right path forward and offers a promising roadmap for raising a new generation of religiously literate Americans *The Business of Education* Joel Spring, John Eric Frankson, Corie A. McCallum, Diane Price Banks, 2017-07-06

The Business of Education a comprehensive view of how education policy is made in the US and in some cases globally analyzes and critiques the influence of educational policy networks in a wide range of contexts and from a variety of perspectives including testing college preparation juvenile detention centers special education the arts teacher evaluation systems education of undocumented immigrants college faculty preparation and financial aid A network chart in most chapters illustrates how the major political actors mainly private philanthropic foundations for profit companies government officials and politicians involved in the network are linked Joel Spring internationally renowned scholar and analyst of educational policy situates and frames the network studies in an introduction discussing general theories of education policy networks

Urban Transportation Planning in the United States Edward Weiner, 2016-09-16 In this new fifth edition there is a strong focus on the increasing concern over infrastructure resilience from the threat of serious storms human activity and population growth The new edition also looks technologies that urban transportation planners are increasingly focused on such as vehicle to vehicle communications and driver less cars which have the potential to radically improve transportation This book also investigates the effects of transportation on the health of travelers and the general public and the ways in which these concerns have become additional factors in the transportation and infrastructure planning and policy process The development of U S urban transportation policy over the past half century illustrates the changing relationships among federal state and local governments This comprehensive text examines the evolution of urban transportation planning from early developments in highway planning in the 1930s to today s concerns over sustainable development security and pollution control Highlighting

major national events the book examines the influence of legislation regulations conferences federal programs and advances in planning procedures and technology The volume provides in depth coverage of the most significant event in transportation planning the Federal Aid Highway Act of 1962 which created a federal mandate for a comprehensive urban transportation planning process carried out cooperatively by states and local governments with federal funding Claiming that urban transportation planning is more sophisticated costly and complex than its highway and transit planning predecessors the book demonstrates how urban transportation planning evolved in response to changes in such factors as the environment energy development patterns intergovernmental coordination and federal transit programs This new edition includes analyses of the growing threats to infrastructure new projects in infrastructure resilience the promise of new technologies to improve urban transportation and the recent shifts in U S transportation policy This book will be of interest to researchers and practitioners in transportation legislation and policy eco justice and regional and urban planning **Priced Out**

Rachael A. Woldoff, Lisa M. Morrison, Michael R. Glass, 2016-03-15 On an average morning in Manhattan's Stuyvesant Town housing development birds chirp as early risers dash off to work elderly residents enjoy a peaceful morning stroll and flocks of parents usher their children to school It seems an unlikely location for conflict and strife yet this eighteen block area initially planned as middle class affordable housing is the site of an ongoing struggle between long term rent regulated residents and newer market rate tenants Priced Out takes readers into this heated battle as a transitioning neighborhood wrestles with contemporary capitalist strategies and the struggle to preserve renters rights Attempting to replace longtime residents with younger more affluent tenants Stuyvesant Town's owners have disrupted native residents sense of place community and perceived quality of life Through interviews with residents the authors offer an intimate view into the lives of different groups of tenants involved in this struggle for prime real estate in New York from students experiencing the city for the first time to baby boomers hanging on to the vestiges of middle class urban life to older residents who have lived in Stuyvesant Town since it opened in 1947 A compelling account of changing urban landscapes and the struggle for security Priced Out offers a comprehensive perspective of a community that to some is becoming unrecognizable as it is upgraded and altered Page 4 of cover **Handbook on the Geographies of Money and Finance** Ron Martin, Jane Pollard, 2017-03-31

The aim of this timely work which appears in the wake of the worst global financial crisis since the late 1920s is to bring together high quality research based contributions from leading international scholars involved in constructing a geographical perspective on money Topics covered include the crisis the spatial circuits of finance regulation mainstream financial markets banking equity etc through to the various alternative and disruptive forms of money that have arisen in recent years It will be of interest to geographers political scientists sociologists economists planners and all those interested in how money shapes and reshapes socio economic space and conditions local and regional development **Class Struggle and Identity Politics** Marc James Léger, 2024-06-03 Contemporary bipartisan politics undermines socialist solidarity by

ignoring class issues and pitting advocates of social justice against ethno national chauvinists This guide to the recent wave of woke culture wars provides a radical class analysis and critique of the most popular academic trends around diversity and inclusion radical democracy intersectionality privilege theory critical race theory and decoloniality The book further explains the complexity of today's cultural conflicts by examining how these issues are viewed across the political spectrum including populist and postmodern perspectives Exploring historical cultural political and economic developments since the postwar era this follow up to Identity Trumps Socialism provides the reader with everything you wanted to know but were afraid to ask about the campus wars that have gone mainstream

Politics, Protest, and Empowerment in Digital Spaces Ibrahim, Yasmin, 2016-12-21 With the ubiquitous nature of modern technologies they have been inevitably integrated into various facets of society The connectivity presented by digital platforms has transformed such innovations into tools for political and social agendas Politics Protest and Empowerment in Digital Spaces is a comprehensive reference source for emerging scholarly perspectives on the use of new media technology to engage people in socially and politically oriented conversations and examines communication trends in these virtual environments Highlighting relevant coverage across topics such as online free expression political campaigning and online blogging this book is ideally designed for government officials researchers academics graduate students and practitioners interested in how new media is revolutionizing political and social communications

How To Think About Cities Deborah G. Martin, Joseph Pierce, 2022-11-29 Cities are raucous cacophonous and complex Many dimensions of life play out and conflict across cities intricate landscapes be they political cultural economic or social Urban policy makers and analysts often attempt to cut through the noise of urban disagreement by emphasizing a dominant lens for understanding the key central logic of the city How To Think About Cities sees this tendency to selective vision as misleading and ultimately unjust cities are many things at once to different people and communities This book describes the various ways of seeing the functions and landscapes of the city as place frames and the constant process of negotiating which place frames best explain the city as place making Martin and Pierce call for an explicitly hybrid perspective that shifts between many different frames for making sense of cities This approach highlights how any given stance opens up some lines of inquiry and understanding while closing off others Thinking of cities as sites of contested perspectives promotes a synthetic approach to urban analysis that emphasizes difference and political possibility This mosaic view of the city will be a welcome read for those within urban studies geography and social sciences exploring the many faces of urban life
