On Unemployment Mark R. Reiff, 2015-10-07 With unemployment at historically high rates that show signs of becoming structural there is a pressing need for an in depth exploration of this economic injustice Unemployment is one of the problems most likely to put critical pressure on our political institutions disrupt the social fabric of our way of life and even threaten the continuation of liberalism itself Despite the obvious importance of the problem of unemployment however there has been a curious lack of attention paid to this issue by contemporary non Marxist political philosophers On Unemployment explores the moral implications of the problem of unemployment despite the continuing uncertainty involving both its causes and its cures Reiff takes up a series of questions about the nature of unemployment and what justice has to tell us about what we should do if anything to alleviate it The book comprehensively discusses the related theory and suggests how we might implement these more general observations in the real world It addresses the politics of unemployment and the extent to which opposition to some or all of the book s various proposals stem not from empirical disagreements about the best solutions but from more basic moral disagreements about whether the reduction of unemployment is indeed an appropriate moral goal This exciting new text will be essential for scholars and readers across business economics and finance as well as politics philosophy and sociology

Buckridge, 2018-02-22 In Caribbean history the European colonial plantocracy created a cultural diaspora in which African slaves were torn from their ancestral homeland In order to maintain vital links to their traditions and culture slaves retained certain customs and nurtured them in

the Caribbean The creation of lace bark cloth from the lagetta tree was a practice that enabled slave women to fashion their own clothing an exercise that was both a necessity as clothing provisions for slaves were poor and empowering as it allowed women who participated in the industry to achieve some financial independence This is the first book on the subject and through close collaboration with experts in the field including Maroon descendants scientists and conservationists it offers a pioneering perspective on the material culture of Caribbean slaves bringing into focus the dynamics of race class and gender Focussing on the time period from the 1660s to the 1920s it examines how the industry developed the types of clothes made and the people who wore them The study asks crucial questions about the social roles that bark cloth production played in the plantation economy and colonial society and in particular explores the relationship between bark cloth production and identity amongst slave women
