2014 November Social Sciences Geography Memorandum:

The Politics of Immigration Tom K. Wong, 2017 Immigration has been deeply woven into the fabric of American nation building since the founding of the Republic. Indeed, immigrants have played an integral role in American history, but they are also intricately tied to America's present and will feature prominently in America's future. Immigration can shape a nation. Consequently, immigration policy can maintain, replenish, and even reshape it. Immigration policy debates are thus seldom just about who to let in and how many, as a nation's immigration policies can define its identity. This is what helps breathe fire into the politics of immigration. Against this backdrop, political parties promote their own narratives about what the immigration policies of a nation of immigrants should be while undermining the contrasting narratives of political opponents. Racial and ethnic groups mobilize for political inclusion as immigration increases their numbers but are often confronted by the counteractive mobilization of nativist groups. Legislators calibrate their positions on immigration by weighing traditional electoral concerns against a new demographic normal that is reshaping the American electorate. At stake are not just what our immigration policies will be but also what America can become. What are the determinants of immigration policymaking in the United States? The Politics of Immigration focuses the analytical lens on the electoral incentives that legislators in Congress have to support or oppose immigration policy reforms at the federal level. In contrast to previous arguments, Tom K. Wong argues that contemporary immigration politics in the United States can be characterized by three underlying features: the entrenchment of partisan divides among legislators on the issue of immigration, the political implications of the demographic changes that are reshaping the American electorate, and how these changes are creating new opportunities to define what it means to be an American in a period of unprecedented national origins, racial, and ethnic and cultural diversity.

Healthy, Resilient, and Sustainable Communities After Disasters Institute of Medicine, Board on Health Sciences Policy, Committee on Post-Disaster Recovery of a Community's Public Health, Medical, and Social Services, 2015-09-10 In the devastation that follows a major disaster there is a need for multiple sectors to unite and devote new resources to support the rebuilding of infrastructure the provision of health and social services the restoration of care delivery systems and other critical recovery needs In some cases billions of dollars from public private and charitable sources are invested to help communities recover National rhetoric often characterizes these efforts as a return to normal But for many American communities pre disaster conditions are far from optimal Large segments of the U S population suffer from preventable health problems experience inequitable access to services and rely on overburdened health systems A return to pre event conditions in such cases may be short sighted given the high costs both economic and social of poor health Instead it is important to understand that the disaster recovery process offers a series of unique and valuable opportunities to improve on the status quo Capitalizing on these opportunities can advance the long term health resilience and sustainability

of communities thereby better preparing them for future challenges Healthy Resilient and Sustainable Communities After Disasters identifies and recommends recovery practices and novel programs most likely to impact overall community public health and contribute to resiliency for future incidents This book makes the case that disaster recovery should be guided by a healthy community vision where health considerations are integrated into all aspects of recovery planning before and after a disaster and funding streams are leveraged in a coordinated manner and applied to health improvement priorities in order to meet human recovery needs and create healthy built and natural environments The conceptual framework presented in Healthy Resilient and Sustainable Communities After Disasters lays the groundwork to achieve this goal and provides operational guidance for multiple sectors involved in community planning and disaster recovery Healthy Resilient and Sustainable Communities After Disasters calls for actions at multiple levels to facilitate recovery strategies that optimize community health With a shared healthy community vision strategic planning that prioritizes health and coordinated implementation disaster recovery can result in a communities that are healthier more livable places for current and future generations to grow and thrive communities that are better prepared for future adversities **A Review of the Landscape**

Conservation Cooperatives National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Board on Agriculture and Natural Resources, Board on Atmospheric Sciences and Climate, Committee on the Evaluation of the Landscape Conservation Cooperatives, 2016-11-28 The United States tradition of conserving fish wildlife habitats and cultural resources dates to the mid 19th century States have long sought to manage fish and wildlife species within their borders whereas many early federal conservation efforts focused on setting aside specific places as parks sanctuaries or reserves With advances in landscape ecology over the past quarter century conservation planners scientists and practitioners began to stress the importance of conservation efforts at the scale of landscapes and seascapes These larger areas were thought to harbor relatively large numbers of species that are likely to maintain population viability and sustain ecological processes and natural disturbance regimes often considered critical factors in conserving biodiversity By focusing conservation efforts at the level of whole ecosystems and landscape practitioners can better attempt to conserve the vast majority of species in a particular ecosystem Successfully addressing the large scale interlinked problems associated with landscape degradation will necessitate a planning process that bridges different scientific disciplines and across sectors as well as an understanding of complexity uncertainty and the local context of conservation work The landscape approach aims to develop shared conservation priorities across jurisdictions and across many resources to create a single collaborative conservation effort that can meet stakeholder needs Conservation of habitats species ecosystem services and cultural resources in the face of multiple stressors requires governance structures that can bridge the geographic and jurisdictional boundaries of the complex socio ecological systems in which landscape level conservation occurs The Landscape Conservation Cooperatives LCC Network was established to complement and add value to the many ongoing state tribal

federal and nongovernmental efforts to address the challenge of conserving species habitats ecosystem services and cultural resources in the face of large scale and long term threats including climate change A Review of the Landscape Conservation Cooperatives evaluates the purpose goals and scientific merits of the LCC program within the context of similar programs and whether the program has resulted in measurable improvements in the health of fish wildlife and their habitats

Invisible Borders in a Bordered World Alexander C. Diener,Joshua Hagen,2022-09-02 This book critically challenges the usual territorial understanding of borders by examining the often messy internal transborder ambiguous and in between spaces that co exist with traditional borders By considering those less visible aspects of borders the book develops an inclusive understanding of how contemporary borders are structured and how they influence human identity mobility and belonging The introduction and conclusion provide theoretical and contextual framing while chapters explore topics of global labor and refugees unrecognized states ethnic networks cyberspace transboundary resource conflicts and indigenous and religious spaces that rarely register on conventional maps or commonplace understandings of territory In the end the volume demonstrates that despite being invisible on most maps these borders have a very real material and tangible presence and consequences for those people who live within alongside and across them

Climate Security Matti Goldberg,2023-12-01 This book presents an empirical study of the role of knowledge in the making of the climate security nexus Climate change might give the Soviet Union a competitive advantage in the Cold War Extreme droughts contributed to wars in Darfur Syria

or Yemen Melting sea ice creates geopolitical risks Russia's climate destroying hydrocarbons enabled its invasion of Ukraine These are just some of the many ways in which climate change and conflicts have been linked into a climate security nexus In this innovative book Matti Goldberg considers how such connections are constructed and asks to what extent they are driven by evidence and science Goldberg describes the tools used to present the wars of Darfur and Syria as climate wars and considers the fragmented role of the sciences in those presentations as well as the resulting patterns of influence and marginalization of impacted populations The author also highlights how the international community can better integrate the situations of people at the frontlines of climate change into policymaking and based on an analysis of the dynamic nature of power identifies potential entry points for positive change This book is a must read for researchers interested in climate security links in science policy interfaces and in the formation of nexuses of issues in international politics It is also of interest to practitioners working on the climate security nexus and science policy interfaces

Colonial Bureaucracy and Contemporary Citizenship Yael Berda, 2022-11-17 Colonial Bureaucracy and Contemporary Citizenship examines how the legacies of colonial bureaucracy continue to shape political life after empire Focusing on the former British colonies of India Cyprus and Israel Palestine the book explores how post colonial states use their inherited administrative legacies to classify and distinguish between loyal and suspicious subjects and

manage the movement of populations thus shaping the practical meaning of citizenship and belonging within their new boundaries The book offers a novel institutional theory of hybrid bureaucracy to explain how racialized bureaucratic practices were used by powerful administrators in state organizations to shape the making of political identity and belonging in the new states Combining sociology and anthropology of the state with the study of institutions this book offers new knowledge to overturn conventional understandings of bureaucracy demonstrating that routine bureaucratic practices and persistent colonial logics continue to shape unequal political status to this day *The Filth Disease* Jacob Steere-Williams,2020

Shows how the investigation of local outbreaks of typhoid fever in Victorian Britain led to the emergence of the modern discipline of epidemiology as the leading science of public health Typhoid fever is a food and water borne infectious disease that was insidious and omnipresent in Victorian Britain It was one of the most prolific diseases of the Industrial Revolution There was a palpable public anxiety about the disease in the Victorian era no doubt fueled by media coverage of major outbreaks across the nation but also because Queen Victoria's husband Prince Albert died of the disease in 1861 Their son and heir Prince Albert Edward contracted and nearly succumbed to typhoid a decade later in 1871 *The Filth Disease* shows that typhoid was at the center of a number of critical debates about health science and governance Victorian public health reformers the book argues working in central and local government framed typhoid as the most pressing public health problem in order to persuade local officials to implement sanitary infrastructure to prevent the spread of disease In this period British epidemiologists uncovered how typhoid is spread via food and water supplies disrupting the longstanding idea that typhoid was spread via filth In the process the modern discipline of epidemiology emerged as the chief science of public health Typhoid was as much a social and political problem as it was a scientific one and *The Filth Disease* provides a striking reminder of the cultural context in which infectious diseases strike populations and how scientists study them

Metropolitan Jews Lila Corwin Berman,2015-05-06 In this provocative and accessible urban history Lila Corwin Berman considers the role that Detroit's Jews played in the city's well known narrative of migration and decline Taking its cue from social critics and historians who have long looked toward Detroit to understand twentieth century urban transformations *Metropolitan Jews* tells the story of Jews leaving the city while retaining a deep connection to it Berman argues convincingly that though most Jews moved to the suburbs urban abandonment disinvestment and an embrace of conservatism did not invariably accompany their moves Instead the Jewish postwar migration was marked by an enduring commitment to a newly fashioned urbanism with a vision of self community and society that persisted well beyond city limits Complex and subtle *Metropolitan Jews* pushes urban scholarship beyond the tenacious black white urban suburban dichotomy It demands a more nuanced understanding of the process and politics of suburbanization and will reframe how we think about the American urban experiment and modern Jewish history *Life in the Age of Drone Warfare* Lisa Parks,Caren Kaplan,2017-10-19 This volume's contributors offer a new critical language through which to explore and assess the historical juridical geopolitical

and cultural dimensions of drone technology and warfare They show how drones generate particular ways of visualizing the spaces and targets of war while acting as tools to exercise state power Essays include discussions of the legal justifications of extrajudicial killings and how US drone strikes in the Horn of Africa impact life on the ground as well as a personal narrative of a former drone operator The contributors also explore drone warfare in relation to sovereignty governance and social difference provide accounts of the relationships between drone technologies and modes of perception and mediation and theorize drones relation to biopolitics robotics automation and art Interdisciplinary and timely *Life in the Age of Drone Warfare* extends the critical study of drones while expanding the public discussion of one of our era's most ubiquitous instruments of war Contributors Peter Asaro Brandon Wayne Bryant Katherine Chandler Jordan Crandall Ricardo Dominguez Derek Gregory Inderpal Grewal Lisa Hajjar Caren Kaplan Andrea Miller Anjali Nath Jeremy Packer Lisa Parks Joshua Reeves Thomas Stubblefield Madiha Tahir

Everyday War Greta Lynn Uehling, 2023-02-15 *Everyday War* provides an accessible lens through which to understand what noncombatant civilians go through in a country at war What goes through the mind of a mother who must send her child to school across a minefield or the men who belong to groups of volunteer body collectors In Ukraine such questions have been part of the daily calculus of life Greta Uehling engages with the lives of ordinary people living in and around the armed conflict over Donbas that began in 2014 and shows how conventional understandings of war are incomplete In Ukraine landscapes filled with death and destruction prompted attentiveness to human vulnerabilities and the cultivation of everyday interpersonal peace Uehling explores a constellation of social practices where ethics of care were in operation People were also drawn into the conflict in an everyday form of war that included provisioning fighters with military equipment they purchased themselves smuggling insulin and cutting ties to former friends Each chapter considers a different site where care can produce interpersonal peace or its antipode everyday war Bridging the fields of political geography international relations peace and conflict studies and anthropology *Everyday War* considers where peace can be cultivated at an everyday level

Assembling Bus Rapid Transit in the Global South Malve Jacobsen, 2020-12-13 This book explores the mobile ethnography of Dar es Salaam where consultants and politicians have planned and implemented a bus rapid transit BRT system for two decades It analyses the dual processes of assembling BRT in the Tanzanian metropolis and establishing BRT as a policy model of and for the Global South The book elucidates how policy models are constructed and circulated around the globe and depicts the processes by which they are translated between and materialise within specific contexts It presents the case of BRT to demonstrate how technocrats shape these processes through persuasive work aimed at disseminating and stabilising this transport model and how local actors influence its adaptation in Dar es Salaam The book adopts a double mobility approach to show how this ethnography follows travelling consultants circulating policies and moving buses to explore the fluidity of the BRT model Linking key debates in policy mobility studies and Science and Technology Studies enriched with postcolonial perspectives and geographies of transport and infrastructure it offers new

insights into the technopolitics of planning and implementing infrastructure systems This book will appeal to academics and students of human geography transport studies science and technology studies and African and development studies interested in the technopolitics of transport planning
