10 in One Study Package for CBSE Science Class 10 with Objective Questions & 3 Sample Papers 4th Edition Disha Experts,2020-08-08 Psychological Studies in the Teaching, Learning and Assessment of Mathematics Yiming Cao,Zsolt Lavicza ,Shuhua An,Lianchun Dong,2024-05-31 There is no doubt that the onset of a new decade has brought high expectations of academic progress for scholars especially for researchers in mathematics education The International Group for the Psychology of Mathematics Education was born in 1976 which focused on the international exchange of knowledge in the psychology of mathematics education the promotion of interdisciplinary research with psychologists mathematicians and mathematics teachers and the development of the psychological aspects of teaching and learning mathematics and its implications Finding Firmer Ground: The Role of Higher Education in U.S.-China Relations Yawei Liu/Michael Cerny,2022-04-27 The U S China educational exchange began auspiciously after a 30 year hiatus in 1978 when Chinese leader Deng Xiaoping announced his strategic decision to send 5 000 students and scholars from China each year to further their education 1 Then U S President Jimmy Carter famously responded Tell him to send 100 000 This was the launch of educational exchange as a core pillar of the U S China relationship Until the 40th anniversary of the normalization of U S China relations and U S China educational exchange in 2019 there was general agreement that the exchange of students and scholars benefited both countries There was recognition that the enormous increase in personal interaction and friendships and knowledge about each other s society culture economy and government strengthened understanding trust and cooperation At a time when U S China relations are at its lowest point since the normalization of relations the benefits of

educational exchange are being questioned if not under assault Few could have predicted that Chinese students would be weaponized by both sides caught up in the political and security disputes between the two governments A trade war political tensions concerns about academic espionage and influence operations rising incidents of anti Asian hate and a global pandemic have created a perfect storm to stir up distrust as well as retaliatory measures that restrict student mobility on both sides of the Pacific After years of fast growth the number of Chinese students and researchers coming to the U S has slowed China is still the largest source of international students in the U S accounting for about one third of the total but America s appeal is weakening Is this shift toward declining numbers an overdue correction to better protect America against academic espionage and influence operations and prevent China from capitalizing on American know how to accelerate its own progress Or is this decline in numbers an unnecessary and damaging hit on American universities preeminent position in global higher education and its open science model leading to loss of U S competitiveness and international prestige This report more broadly is an attempt to discern the benefits risks and challenges of U S China educational exchange and determine how educational exchange can advance the interests of both the U S and China going forward

Creating Effective Teaching and Learning Spaces: Shaping Futures and Envisioning Unity in Diversity and Transformation Zilungile Lungi Sosibo,Eunice Ivala,2021-09-07 Higher education in post apartheid South Africa was always likely to attract academic interest and yet there remains a dearth of research on creating teaching and learning spaces suitable for students from diverse backgrounds Using examples from higher education institutions across the Southern African Developing Community SADC region this volume explores the ways teaching and learning spaces are being used to advance the transformation agenda of higher education in these regions and provides concrete recommendations for the future The book is sure to appeal to academics from a variety of disciplines from African African American and ethnic studies to education and sociology It will be of particular interest to teacher trainers administrators and policy makers working in higher education and anyone else with a stake in managing cultural diversity in education

Being a Teacher in Post-Apartheid South Africa Yusuf Sayed,Marcina Singh,2025-05-01 In a compelling exploration of the challenges faced by newly qualified teachers NQTs in South Africa s evolving educational landscape this book provides an empirically grounded account of their experiences Drawing on extensive research it offers a poignant narrative that seeks to illuminate the nuanced journey these educators embark upon as they transition from teacher education spaces to the complex reality of classrooms in post Apartheid South Africa The book acts as a crucial platform for the voices of NQTs shedding light on the myriad enablers and disablers they encounter during this transformative period Timely and relevant it tackles pressing questions about the readiness of teacher education to prepare students for the demands of South African schools The book charts the transition from teacher education to active teacher for NQTs The lessons distilled from this research present a clarion call for a re assessment of teacher education policies and practices This book arrives at a pivotal moment as South

Africa reviews its teacher education policies With the quality of initial teacher education programmes under scrutiny the book's critiques findings and recommendations serve as indispensable tools for policymakers arguing for the need to reconceptualise South African teacher education policies As South Africa strives to avoid a cycle of developing new teachers only to lose them due to inadequate support this book seeks to support educators policymakers and all those invested in the future of South African education toward creating a more socially just education system recognising the highly unequal society in which teachers work
