2014 June Exam Economics Paper 2:

Banking's Final Exam Morris Goldstein, 2017-05-30 Spurred by the success of the first stress test of US banks toward the end of the global economic crisis in 2009 stress testing of large financial institutions has become the cornerstone of banking supervision worldwide The aim of the tests is to determine which banks are adequately capitalized under severe economic shocks and to order corrective measures for those that are vulnerable In *Banking's Final Exam* one of the world's leading experts on banking regulation concludes that the tests administered on both sides of the Atlantic suffer from fundamental weaknesses leading to a false sense of reassurance about the safety and soundness of the banking system Some weaknesses can be corrected within the existing bank capital regime but others will require bold reforms including higher minimum capital requirements for the largest and most systemically important banks The banking industry is likely to resist these reforms but this book explains why their objections do not hold water

Africa's Pulse Spring 2015 Punam Chuhan-Pole,2015-04-13 Africa s Pulse is a biannual publication containing an analysis of the near term macro economic outlook for the region It also includes a section focusing on a topic that represents a particular development challenges for the continent It is produced by the Office of the Chief Economist for the Africa Region This issue is an analysis of issues shaping Africa s economic future Growth remains stable in Sub Saharan Africa Some countries are seeing a slowdown but the region s economic prospects remain broadly favorable External risks of higher global financial market volatility and lower growth in emerging market economies weigh on the downside In several Sub Saharan African countries large budgetary imbalances are a source of vulnerability to exogenous shocks and underscore the need for rebuilding fiscal buffers in these countries The Ebola outbreak is exacting a heavy human and economic toll on affected countries and if not rapidly contained the risk of wider contagion grows Without a scale up of effective interventions growth would slow markedly not only in the core countries Guinea Liberia and Sierra Leone but also in the sub region as transportation cross border trade and supply chains are severely disrupted In Sub Saharan Africa growth in agriculture and services is more effective at reducing poverty than growth in industry Structural transformation has a role to play in accelerating poverty reduction in Sub Saharan Africa Increasing agricultural productivity will be critical to fostering structural transformation Boosting rural income diversification can facilitate this transformation as well Investments in rural public goods and services for example education health rural roads electricity and ICT including in small towns will be conducive to lifting productivity in the rural economy Although Sub Saharan Africa s pattern of growth has largely bypassed manufacturing growing the region s manufacturing base especially by improving its fundamentals lower transport cost cheaper and more reliable power and a more educated labor force will benefit all sectors *Global Financial Stability Report, October 2014* International Monetary Fund. Monetary and Capital Markets Department,2014-10-08 The October 2014 issue finds that six years after the start of the crisis the global economic recovery continues to rely heavily on accommodative monetary policies in advanced economies Monetary accommodation remains critical in supporting economies by encouraging economic risk taking in the form of increased real spending by households and greater willingness to invest and hire by businesses However prolonged monetary ease may also encourage excessive financial risk taking Analytical chapters examine 1 the growth of shadow banking around the globe assessing risks and discussing regulatory responses and

calling for a more encompassing macroprudential approach to regulation and for enhanced data provision and 2 how conflicts of interest among bank managers shareholders and debt holders can lead to excessive bank risk taking from society's point of view finding no clear relation between bank risk and the level of executive compensation but that a better alignment of bankers pay with long term outcomes is associated with less risk

The End of Public Schools David W. Hursh, 2015-10-16 The End of Public Schools analyzes the effect of foundations corporations and non governmental organizations on the rise of neoliberal principles in public education By first contextualizing the privatization of education within the context of a larger educational crisis and with particular emphasis on the Gates Foundation and influential state and national politicians it describes how specific policies that limit public control are advanced across all levels Informed by a thorough understanding of issues such as standardized testing teacher tenure and charter schools David Hursh provides a political and pedagogical critique of the current school reform movement as well details about the increasing resistance efforts on the part of parents teachers and the general public

The Testing Charade Daniel Koretz, 2017-08-31 For decades we've been studying experimenting with and wrangling over different approaches to improving public education and there's still little consensus on what works and what to do The one thing people seem to agree on however is that schools need to be held accountable we need to know whether what they're doing is actually working But what does that mean in practice High stakes tests Lots of them And that has become a major problem Daniel Koretz one of the nation's foremost experts on educational testing argues in *The Testing Charade* that the whole idea of test based accountability has failed it has increasingly become an end in itself harming students and corrupting the very ideals of teaching In this powerful polemic built on unimpeachable evidence and rooted in decades of experience with educational testing Koretz calls out high stakes testing as a sham a false idol that is ripe for manipulation and shows little evidence of leading to educational improvement

Rather than setting up incentives to divert instructional time to pointless test prep he argues we need to measure what matters and measure it in multiple ways not just via standardized tests Right now we re lying to ourselves about whether our children are learning And the longer we accept that lie the more damage we do It s time to end our blind reliance on high stakes tests With *The Testing Charade* Daniel Koretz insists that we face the facts and change course and he gives us a blueprint for doing better
