health security **Synthetic Biology Analysed** Margret Engelhard, 2016-04-15 Synthetic biology is a dynamic young ambitious attractive and heterogeneous scientific discipline It is constantly developing and changing which makes societal evaluation of this emerging new science a challenging task prone to misunderstandings Synthetic biology is difficult to capture and confusion arises not only regarding which part of synthetic biology the discussion is about but also with respect to the underlying concepts in use This book offers a useful toolbox to approach this complex and fragmented field It provides a biological access to the discussion using a layer model that describes the connectivity of synthetic or semisynthetic organisms and cells to the realm of natural organisms derived by evolution Instead of directly reviewing the field as a whole firstly our book addresses the characteristic features of synthetic biology that are relevant to the societal discussion Some of these features apply only to parts of synthetic biology whereas others are relevant to synthetic biology as a whole In the next step these new features are evaluated with respect to the different areas of synthetic biology Do we have the right words and categories to talk about these new features In the third step traditional concepts like life and artificiality are scrutinized with regard to their discriminatory power This approach may help to differentiate the discussion on synthetic biology Lastly our refined view is utilized for societal evaluation We have investigated the public views and attitudes to synthetic biology It also includes the analysis of ethical risk and legal questions posed by present and future practices of synthetic biology This book contains the results of an interdisciplinary research project and presents the authors main findings and recommendations They are addressed to science industry politics and the general public interested in this upcoming field of biotechnology

The Biological Weapons Taboo Michelle Bentley, 2023 The non use of biological weapons has been described as the great mystery of biological warfare The Biological Weapons Taboo solves that mystery by analysing the bioweapons taboo in the first comprehensive study of the concept Bentley explains precisely why bioweapons are perceived as repulsive and how this sentiment is consequently expressed in the form of political behaviours including the refusal to engage in biological aggression Drawing on extensive archival evidence this volume looks back on United States foreign policy decision making particularly in relation to the Geneva Protocol and the Biological Weapons Convention to demonstrate how and why the taboo has comprised a decisive factor in shaping both biowarfare strategy and political rhetoric and why the taboo needs to be recognised as a necessary consideration in the study of bioweapons In analysing a taboo the volume also takes the debate on international norms forward by questioning and challenging the wider analytic comprehension of taboo itself Rejecting current definitions of the concept as inadequate Bentley proposes a new and original model of understanding based on the normative characteristics of disgust stigmatization and fetishization *Fish Reproductive Biology* Tore Jakobsen, Michael J. Fogarty, Bernard A. Megrey, Erlend Moksness, 2016-03-21 Fish recruitment is a key process for maintaining sustainable fish populations In the marine environment fish recruitment is carried out in many different ways all of which have different life history strategies The objective of this book is to argue for greater linkages between basic and applied research on fisheries

recruitment and assessment and management of exploited fish stocks Following an introductory chapter this second edition of *Fish Reproductive Biology* is organized into 3 main sections Biology Population Dynamics and Recruitment Information Critical to Successful Assessment and Management Incorporation of Reproductive Biology and Recruitment Considerations into Management Advice and Strategies The authors collectively bring a wide range of diverse experience in areas of reproductive biology fisheries oceanography stock assessment and management Fully updated throughout the book will be of great interest to a wide audience It is useful as a textbook in graduate and undergraduate courses in fisheries biology fisheries science and fisheries resource management and will provide vital information for fish biologists fisheries scientists and managers

Love and Selfhood Annemarie van Stee, 2022-07-27 After years of neurohype and a neuroskeptical backlash this book provides a systematic analysis of the contributions to self understanding cognitive neuroscience CNS and philosophy can make The stories of five people in search of self understanding serve as touchstone throughout the book Their identities are tied up with what they love The book provides in depth analyses of CNS of love and CNS of self reflection It critically discusses philosophers who focus on the relation between love self understanding and selfhood such as Harry Frankfurt Susan Wolf Charles Taylor and Søren Kierkegaard It also builds an argument about CNS contributions to self understanding more broadly and how different these are from philosophy's contributions The book develops conceptual review as a philosophical method for improving the validity and comparability of CNS studies It integrates CNS insights into its philosophical view on love and selfhood where applicable This book thus argues and exemplifies that philosophy and CNS can work together
