**Global Maritime Military Strategy, 1980-2023** Keitaro Ushirogata, 2025-03-17 This open access book is an ambitious study about how to use comparative methods to analyze contemporary military strategy in the maritime domain Based on the three strategic concepts of area denial sea control and power projection this book analyzes the intensive conventional capabilities of six major powers military strategies These include the United States the United Kingdom and Japan the so called sea powers and Russia China and India which are usually recognized as land powers Through the analysis this book aims to accomplish the following three main objectives

- 1 To reconsider the basic concepts of maritime military strategic studies which have not changed for almost one hundred years and to propose a new analytical framework based on the following three elements as well as verifying the appropriateness of this framework
- a The capability with which a country can deny military threat against its territory through the maritime domain within the geographic theater i.e. roughly one thousand to two thousand kilometers from its coastline
- b area denial
- b The capability with which a country can obtain military superiority or disrupt an adversary's military superiority in the open ocean
- c sea control
- c The capability with which a country can project military power from the maritime domain to other countries territories accomplishing military strategic objectives

power projection

- 2 To verify the six major powers long term military strategic objectives for example whether the country aims to enhance its power in the maritime domain or to project its military power to the other countries areas beyond the maritime domain to do this by analyzing each country's force

building directions In addition this book assesses each country s capability for high intensive conflict and unravels each security military strategic objectives 3 By examining the strategic objectives of major powers this book may contribute to establishing Japan s future defense strategy *Federal Register* ,2013-05 *Target NTSE Class 10 Stage 1 & 2 Solved Papers (2015 - 21) + 5 Mock Tests (MAT + SAT) 7th Edition* Disha Experts,2021-08-01 Israeli National Security Charles David Freilich,2018 The most comprehensive study to date of Israel s national security It combines an exhaustive analysis of the military diplomatic demographic and societal challenges Israel faces with the responses it has developed to present a detailed proposal for an overall new national security strategy the first such Israeli strategy ever published **Minerals Yearbook** Geological Survey,Interior Department,Mines Bureau,2019-01-31 This volume covering metals and minerals contains chapters on approximately 90 commodities In addition this volume has chapters on mining and quarrying trends and on statistical surveying methods used by Minerals Information plus a statistical summary *The Eighties* Frank Bongiorno,2017-01-12 Winner of the ACT Book of the Year Award Shortlisted for the Ernest Scott Prize and CHASS Australia Prize It was the era of Hawke and Keating Kylie and INXS the America s Cup and the Bicentenary It was perhaps the most controversial decade in Australian history with high flying entrepreneurs booming and busting torrid debates over land rights and immigration the advent of AIDS a harsh recession and the rise of the New Right It was a time when Australians fought for social change on union picket lines at rallies for women s rights and against nuclear weapons and as part of a new environmental movement And then there were the events that left many scratching their heads Joh for Canberra the Australia Card Cliff Young In The Eighties Frank Bongiorno brings all this and more to life He sheds new light on both the ordinary and extraordinary things that happened to Australia and Australians during this liveliest of decades The definitive account of an inspired infuriating decade George Megalogenis A very impressive achievement The Monthly Meaty and entertaining The Australian **Scotland's Choices** Iain McLean,2014-05-30 Scotland s Choices now fully revised for the critical last few months before the referendum explains the choice that Scotland will have to make in September 2014 The authors clearly explain the issues and how each of the options would be put into place **The Privatization of Israeli Security** Shir Hever,2017-11-20 Between 1994 2014 Israel s security service was transformed becoming one of the most extreme examples of privatised security in the world This book is an investigation into this period and the conditions that created Occupation Inc the institution of a private military security industrial complex State sponsored violence is increasing as a result of this securitisation but why is it necessary and what are its implications In this book Shir Hever considers the impact of the ongoing Palestinian resistance to Israeli occupation the influence of U S military aid and the rise of neoliberalism in Israel to make sense of this dramatic change in security policy Through the lens of political economy this book shows how the Israeli security elites turn violence into a commodity in order to preserve their status and wealth providing a fresh new perspective on the Israeli occupation **Handbook of Research on Comparative Human**

Fogelson, 2022-10-18 One of the nation's foremost urban historians traces the history of cooperative housing in New York City from the 1920s through the 1970s. As World War II ended and Americans turned their attention to problems at home, union leaders and other prominent New Yorkers came to believe that cooperative housing would solve the city's century-old problem of providing decent housing at a reasonable cost for working-class families. *Working-Class Utopias* tells the story of this ambitious movement from the construction of the Amalgamated Houses after World War I to the building of Co-op City, the world's largest housing cooperative, four decades later. Robert Fogelson brings to life a tumultuous era in the life of New York, drawing on a wealth of archival materials such as community newspapers, legal records and personal and institutional papers. In the early 1950s, a consortium of labor unions founded the United Housing Foundation under the visionary leadership of Abraham E. Kazan, who was supported by Nelson A. Rockefeller, Robert F. Wagner Jr and Robert Moses. With the help of the state, which provided below-market-rate mortgages and the city, which granted tax abatements, Kazan's group built large-scale cooperatives in every borough except Staten Island. Then came Co-op City, built in the Bronx in the 1960s as a model for other cities but plagued by unforeseen fiscal problems culminating in the longest and costliest rent strike in American history. Co-op City survived, but the United Housing Foundation did not, and neither did the cooperative housing movement. *Working-Class Utopias* is essential reading for anyone seeking to understand the housing problem that continues to plague New York and cities across the nation. *Toward a World-class Passenger Rail System in California* California. Legislature. Senate. Committee on Transportation and Housing, 2014 [Congressional Record](#), **Arab Dawn** Bessma Momani, 2015-11-26 In the West, news about the Middle East is dominated by an endless stream of reports and commentary about civil war, sectarian violence, religious extremism and economic stagnation. But do they tell the full story? For instance, who knew that university enrolment in the war-torn Palestinian territories exceeds that of Hong Kong, or that more than a third of Lebanese entrepreneurs are women? Change is on its way in the Middle East, argues Bessma Momani, and its cause is demographic. Today, one in five Arabs is between the ages of fifteen and twenty-four. Young, optimistic and increasingly cosmopolitan, their generation will shape the region's future. Drawing on interviews, surveys and other research conducted with young people in fifteen countries across the Arab world, Momani describes the passion for entrepreneurship reform and equality among Arab youth. With insightful political analysis based on the latest statistics and first-hand accounts, *Arab Dawn* is an invigorating study of the Arab world and the transformative power of youth. **Global Social Policy** Kepa

Artaraz,Liz Cunningham,Michael Hill,2016-06-29 Social policy is a subject that helps develop our understanding of the meaning of human wellbeing and of the systems by which wellbeing must be promoted As a discipline social policy has traditionally been blunted by a focus on the nation state however in this age of globalisation the most pressing challenges such as climate change ageing populations and flagging economies serve as proof that even at national level social policy is now more heavily influenced by global factors than ever before In this important and authoritative text Kapa Artaraz and Michael Hill provide a richly detailed contribution to our understanding of the global forces shaping social problems today Part One discusses the different approaches to social policy and explores the process of globalisation looking particularly at its winners and losers and the implications it has for human well being Part Two examines more closely the key actors in global social policy such as the market the state and international organisations and Part Three provides an opportunity to explore some specific key issues of global importance such as employment and migration demographic change and global poverty Adding considerable momentum to the movement away from a reductionist nationally focused study of the discipline Global Social Policy opens up new and stimulating discussions and provides a fresh framework for the study of human well being Using policy examples from areas around the world to provide a truly international scope it is an essential read for students studying at all levels

**Eskom** Sylvy Jaglin,Alain Dubresson,2016-08-16 Africa s leading producer of electricity Eskom Holdings SOC Ltd is also a vertically integrated monopoly owned by the South African state This national champion was shaken in 2008 when it was obliged to introduce load shedding or rolling blackouts and again in late 2014 Trying to understand how and why one of the iconic pillars of South African state capitalism is now in distress the authors of this book argue that the so called electricity crisis is in fact a public monopoly crisis Moving beyond technical aspects they explore the relationship between state power and Eskom before during and after apartheid From this perspective they suggest that the current technical and financial troubles of this public utility are illustrative of the weakening of its technopolitical regime of how national institutions have governed Eskom s technological development and of the pursuit of political goals in the production of electrical power Without a clear industrial strategy during the 2000s Eskom became a powerful tool of Broad Black Economic Empowerment as well as a neopatrimonial system which generates profits captured by the ruling party As a result crisis in Eskom shakes the whole political edifice Inefficient and its finances increasingly under scrutiny this state owned enterprise s existence as a monopolistic public utility is regularly a subject of debate The authors discuss the ambivalent role of Eskom in the national energy transition policy and whether solutions point in the direction of de integrating this public monopoly and allowing its current technopolitical regime to enter a planned or natural decline

*Preventing Chemical Weapons* Lijun Shang, Malcolm Dando, Michael Crowley, 2018-08-20 The life and chemical sciences are in the midst of a period of rapid and revolutionary transformation that will undoubtedly bring societal benefits but also have potentially malign applications notably in the development of chemical weapons Such concerns are exacerbated by the unstable international security environment and the changing nature of armed conflict which could fuel a desire by certain States to retain and use existing chemical weapons as well as increase State interest in creating new weapons whilst a broader range of actors may seek to employ diverse toxic chemicals as improvised weapons Stark indications of the multi faceted dangers we face can be seen in the chemical weapons attacks against civilians and combatants in Iraq and Syria and also in more targeted chemical assassination operations in Malaysia and the UK Using a multi disciplinary approach and drawing upon an international group of experts this book analyses current and likely near future advances in relevant science and technology assessing the risks of their misuse The book examines the current capabilities limitations and failures of the existing international arms control and disarmament architecture notably the Chemical Weapons Convention in preventing the development and use of chemical weapons Through the employment of a novel Holistic Arms Control methodology the authors also look beyond the bounds of such treaties to explore the full range of international law international agreements and regulatory mechanisms potentially applicable to weapons employing toxic chemical agents in order to develop recommendations for more effective routes to combat their proliferation and misuse A particular emphasis is given to the roles that chemical and life scientists health professionals and wider informed activist civil society can play in protecting the prohibition against poison and chemical weapons and in working with States to build effective and responsive measures to ensure that the rapid scientific and technological advances are safeguarded from hostile use and are instead employed for the benefit of us all

*Chains of Finance* Diane-Laure Arjaliès, Philip Grant, Iain Hardie, Donald A. MacKenzie, Ekaterina Svetlova, 2017 This book suggests that investment decisions cannot be understood by focusing on isolated investors Rather

most of their money flows through a chain a sequence of intermediaries that sit between savers and companies governments It argues that investment management is shaped by the opportunities and constraints that this chain creates **National Security, Democracy, & Good Governance in Post-Military Rule Nigeria, Volume One** Dr. Dan Mou, 2016-12-30 This book shows that the security economic political and social problems challenging national security democracy and good governance currently in Nigeria would get better or worse depending on what happens to the seventy one percent 71% of Nigerias population still living below poverty line This is in spite of the billions of petrodollars that Nigeria garnered as revenue over the past few decades It reveals that one does not need to be a political prophet to predict that if these challenges are not successfully addressed through good governance and inclusive growth this country will witness the worst civil disobedience violence revolts militancy breakdown of law and order more kidnappings and more of the citizens trying to check out of the country to other parts of the world in future It concludes however that under such intense pressures the Government of Nigeria even if it is simply for its self preservation will be forced by the objective conditions to move against the interests of the dominant groups and classes in Nigeria These are the ones who have for long captured and hijacked state power and the resources of the country for their exclusive use
