Čambál,2014-10-04 Moving the AEC Beyond 2015 Tham Siew Yean,2018-02-14 The ten Southeast Asian economies reached a milestone on 31 December 2015 when they announced the formation of an ASEAN Community Although this includes three pillars ASEAN Political Security Community ASEAN Economic Community AEC and the ASEAN Socio Cultural Community it is the economic pillar that generates immense debate due to its expected quantifiable benefits to member countries This book thus focuses on the ASEAN Economic Community and seeks to explain the need for building domestic consensus within the member countries It starts with an overview chapter describing the current achievements of the AEC It then explores possible explanations for the achievements non achievements and offers a hypothesis on conflicting economic interests in a country as one possible explanation for gaps in implementation This is because any form of economic liberalisation brings with it the winners and losers thereby raising resistance to liberalization measures and slowing down the implementation process The book includes six country chapters Indonesia Malaysia the Philippines Singapore Thailand and Vietnam that examine sources of domestic conflict s in greater detail and depth It also includes a regional chapter co authored by the ex Secretary General of ASEAN Mr Rodolfo Severino that brings out the political nature of ASEAN economic cooperation since its inception in 1976 For ASEAN beyond 2015 the book articulates the need to obtain a strong domestic consensus that supports the integration initiatives of the AEC This can be viewed as a way forward to accelerate and deepen integration within ASEAN The book concludes with some suggestions on how each country can move towards achieving domestic consensus based on the respective country level analysis *Sustainable Energy Resources and Economics in Iceland and Greenland* Helga Kristjánsdóttir,2015-05-06 This book provides fascinating examples of the ways renewable and sustainable energy can support economic growth which will be illuminating for academic researchers and students as well as those interested in green investment opportunities The distinctive glacial volcanic and oceanic environments of Iceland and Greenland supply abundant renewable energy resources in the form of hydropower and geothermal energy As one of the few nations in the world with 100% renewable electricity production Iceland is a compelling case study of a sustainable energy driven economy Consideration of Greenland provides an interesting contrast as its enormous potential for hydropower scale up has only been minimally harnessed The variable and fixed cost factors governing further expansion and export of the regions sustainable power via sub sea cable are detailed Marx, Veblen, and the Foundations of Heterodox Economics Tae-Hee Jo,Frederic Lee,2015-07-30 John F Henry is an eminent economist who has made important contributions to heterodox economics drawing on Adam Smith Karl Marx Thorstein Veblen and John Maynard Keynes His historical approach offers radical insights into the evolution of ideas ideologies and theories giving rise to and or induced by the changes in capitalist society Essays collected in this festschrift not only evaluate John Henry s contributions in connection to Marx s and Veblen s theories but also apply them to the socio economic issues in the 21st century In Part I leading heterodox economists in the traditions of Marxism Post Keynesianism and Institutionalism critically examine Marx s and Veblen s theoretical

The Economic and Fiscal Consequences of Immigration National Academies of Sciences, Engineering, and Medicine,Division of Behavioral and Social Sciences and Education,Committee on National Statistics,Panel on the Economic and Fiscal Consequences of Immigration,2017-07-13 The Economic and Fiscal Consequences of Immigration finds that the long term impact of immigration on the wages and employment of native born workers overall is very small and that any negative impacts are most likely to be found for prior immigrants or native born high school dropouts First generation immigrants are more costly to governments than are the native born but the second generation are among the strongest fiscal and economic contributors in the U S This report concludes that immigration has an overall positive impact on long run economic growth in the U S More than 40 million people living in the United States were born in other countries and almost an equal number have at least one foreign born parent Together the first generation foreign born and second generation children of the foreign born comprise almost one in four Americans It comes as little surprise then that many U S residents view immigration as a major

policy issue facing the nation Not only does immigration affect the environment in which everyone lives learns and works but it also interacts with nearly every policy area of concern from jobs and the economy education and health care to federal state and local government budgets The changing patterns of immigration and the evolving consequences for American society institutions and the economy continue to fuel public policy debate that plays out at the national state and local levels The Economic and Fiscal Consequences of Immigration assesses the impact of dynamic immigration processes on economic and fiscal outcomes for the United States a major destination of world population movements This report will be a fundamental resource for policy makers and law makers at the federal state and local levels but extends to the general public nongovernmental organizations the business community educational institutions and the research community
