Dr Anil Malleshi Betigeri, In practicing anatomic pathology the pathology report is a reflection of the pathologist's competence based on the precision and accuracy involved in finalizing it. Although designing comprehensive quality system policies and procedures at the department level would appear to be the logical approach in the right direction, precision which can create a butterfly effect in clinical outcome. Clinical practitioners play an essential role in error reduction through several avenues such as effective test ordering, providing accurate and pertinent clinical information, procuring high quality specimens, providing timely follow up on test results, effectively communicating on potentially discrepant diagnoses, and advocating second opinions on the pathology diagnosis in specific situations. This is indeed the right time to consider a re look into the functioning of our anatomic pathology departments. Multidisciplinary approach is ideal way forward in analyzing our final Diagnosis.

Evolution and the Big Questions David N. Stamos, 2011-09-23. Evolution and the Big Questions. David N Stamos's Evolution and the Big Questions delivers what its title promises: you get to look at all of the issues such as race and ethics and religion that make the study of evolution so interesting and more than just a science. The book is written in a clear and friendly manner and deserves a very wide readership. Michael Ruse, Florida State University. This provocative text considers whether evolutionary explanations can be used to clarify some of life's biggest questions. It offers a lively, informative and timely look at a wide variety of key issues facing all of us today, including questions of race, sex, gender, the nature of language, religion, ethics, knowledge, consciousness, and ultimately the meaning of life. Some of the questions examined are: Did evolution make men and women fundamentally different? Is the concept of race merely a social construction? Is morality, including universal human rights, a mass delusion? Can religion and evolution really be harmonized? Does evolution render life meaningless? Designed for students and anyone with an interest in the relationship between evolutionary heritage and human nature, the text takes an interdisciplinary approach and offers direction for further reading and research. Each chapter presents a main topic together with discussion of related ideas and arguments from various perspectives. Along the way it poses life's biggest questions, pulling no punches and presenting a challenge to thinkers on all levels.
