spectrum disorder is a developmental disorder that typically appears in childhood and symptoms can vary in intensity or manifestation throughout a person's lifetime. It is characterized by persistent lifelong impairments in social communication as well as the presence of restricted repetitive patterns of behavior, interests, or activities.<sup>2</sup> There is no minimum number of questions that you must answer positively to qualify as having a symptom. And not everyone experiences these traits in the same way. The key word in autism spectrum disorder is spectrum; we are a diverse group of individuals with varied life experiences.<sup>3</sup> If you have Asperger's, you may struggle with social interactions. You may find it difficult to approach others to initiate a conversation, and you may have difficulty entering into a social group or conversation. You may struggle with knowing when it's your turn to talk, and you may frequently interrupt others or leave unusually long pauses in conversations.<sup>4</sup> If you have trouble coordinating eye contact and gestures during conversation, you may have prosopagnosia. If you are unable to read other people's facial expressions or body language, you may have apraxia.

**Answers for the 4-A Epidemic**  
Joseph A. Cannizzaro, 2012-03-06. Answers for the new childhood epidemics: Autism, ADHD, Asthma, Allergies. The statistics are alarming. Diagnosed cases of autism, ADHD, asthma, and allergies are increasing exponentially, especially among children. If your child is struggling with any of these conditions, you know that the search for answers can be overwhelming. After thirty years in pediatric medicine, Dr. Joseph Cannizzaro has found an unmistakable web of interrelationship among the 4 A disorders and has learned to recognize many of the patterns behind them. In *Answers for the 4 A Epidemic*, he lays a foundation for understanding this epidemic, including a comprehensive overview of each of the disorders, their causes, characteristics, and commonalities. A groundbreaking integrative treatment program that includes nutrition supplementation, medication, and detoxification.

*Adults with Autism*  
Una Cuthbert, 2018-06-12. Why am I wired so differently? Adults that have been undiagnosed with Autism Spectrum Disorder (ASD) often have mild symptoms. This was previously called Asperger's Syndrome but is now called ASD. They can struggle with social interactions and sensory overload but remain unaware. However, having some symptoms doesn't mean you have ASD, but the only way to find out is through an ASD assessment. This book explains the process of autism diagnosis, answering the questions that follow: What is Autism Spectrum Disorder (ASD)? What does an ASD assessment entail? Should I tell my doctor? Should I share this with my friends and family? What do I do once I'm diagnosed? What's the best way to cope with the emotional impact of the diagnosis? How can I thrive and add value to the world? And much more. All the above questions are answered in this book through a former patient's personal account after being diagnosed with autism. Containing humorous anecdotes and stories, this book provides an alternative perspective of looking at Autism Spectrum Disorder. This book also contains Practical Strategies to Reduce Stress and Maximize Progress, Tactics to Assess Everyday

Thoughts and Patterns That Are Disruptive Roadmaps and Mindsets To Navigate Daily Life Strategies for Improving Communication Social Skills and Making Friends The experiences in this book highlight the reflections of a man coming to peace with his diagnosis and how this was his path to serenity This book is a guide for adults who thinking about getting an ASD assessment or for a friend or family member who wants knowledge of the process before and after diagnosis To purchase this book click Buy Now

@Kintsugi,2024-05-03 Growing up I felt stupid Oh so stupid Like I didn't fit in It was as if I'd been dropped in to suburbia from another planet an alien Perhaps if I had had a major meltdown I would have flagged the help I desperately needed But no I suffered I felt so alone lost There was no one else like me I hid behind a mask and adhered to society norms of being a male worker robot person in middle class society Fortunately or not I was able to mask really well and hide myself away I built a life a job a house had a child all the usual things people aspire to On the surface all was normal I just thought I was different not less just different but didn't know why I could never understand the way people reacted to me I was being nice but still they didn't like me as if I had hurt someone close to them I still don't get this My child was diagnosed high functioning autism As many parents will attest the autism education journey is full of questions and no answers I struggled to understand and got to the point where I had to draw on my abilities as a researcher and self learner to better understand

Autism Asperger's high functioning and the psychology underpinning these various terms My journey of self discovery was not at all what I was expecting Using my research skills I started reading academic papers books blogs and other information sources This led to many Ahhh ooh aww moments for me to discount what I was slowly realising This was not going to be a journey to discover my child this was a journey to discover myself inVisible unSeen and others like me inVisible People The inVisible Generation Why inVisible Spectrumites think and process ideas differently but on the surface society doesn't see this The things that I and others do differently are hidden from view We are the Quiet Achievers running a different operating system in a world built for the 98% We physically look the same and have the same capabilities but the way we work under the cover is different Different not less Just Different With estimates between 1% 2% of the population being on the Autism Spectrum 1 in 100 Australians more than 1 in 100 in the UK and 1 in 59 Americans an understanding of what this means for tens of millions of people is becoming more and more important Sadly I also learnt that adults on the Spectrum are eight to nine times more likely to commit suicide than a neurotypical person and 28 times more likely to exhibit suicidal thoughts and this really hit home because I too had been there But I survived and I have my story to tell Society as a whole should be looking for a way to support and respect each and every individual Spectrumite in their own way
