

A Single Shard by Linda Sue Park

A Single Shard is a story about a boy and his dream of becoming a master potter.

EXPOSITION

Tree-ear lives in the small Korean village of Ch'ulp'o, under a bridge with his caretaker, an old, one-legged man named Crane-man. Tree-ear is obsessed with pottery, and spends his days watching the talented potters create their masterpieces. Tree-ear works for master potter Min, and learns that Min has great talent.

RISING ACTION

When an emissary visits the village, Min is chosen as a finalist to create for royalty. Min smashes his pieces that he thinks aren't perfect, and the emissary gives him one more chance: bring some vases to the palace when they are done. Tree-ear offers to make the journey for Min.

CLIMAX

Along his journey to Songdo, Tree-ear is robbed. The robbers take Min's beautiful vases and throw them off of a high cliff, shattering them to pieces.

FALLING ACTION

Tree-ear refuses to give up, and goes to the bottom of the mountain to find the broken vases. He finds a piece large enough to take to the palace, and the emissary is impressed.

RESOLUTION

Min gets commissioned to the palace, and when Tree-ear returns home, he is sad to hear that Crane-man has died. However, Tree-ear is happy to be a part of Min and Ajima's family.

Sharding Blockchain: Fundamentals and Applications Yizhong Liu, Dongyu Li, Jianwei Liu, 2025-05-10 This book presents a novel approach by decoupling the various modules of sharding blockchains and providing detailed insights into the functions and design methodologies of each key module Previous sharding blockchain solutions suffered from tight coupling between functional modules making it challenging to achieve optimal security performance and scalability Building upon this foundation the authors present a universal composable method for composing sharding blockchains in a flexible manner Additionally the authors propose a novel shard member configuration method that leverages proof of work and verifiable distributed randomness to guarantee that each shard maintains a sufficient proportion of honest nodes preventing it from falling below the safety threshold Furthermore the authors offer a complete design methodology for creating secure and scalable sharding blockchains This includes reducing the complexity of intra shard transaction processing through aggregation supported multi signature The authors ensure optimal sharding of computational communication and storage resources within a formal security framework To facilitate flexible cross shard transaction processing the authors introduce a new cross shard Byzantine fault tolerance protocol Lastly the authors explore practical applications of sharding blockchains in typical scenarios In the context of zero trust cloud edge end scenarios the authors demonstrate how sharding blockchains enable scalable data cross shard sharing Simultaneously the authors design a secure and universally applicable cross domain device authentication scheme
