A Week In December

David Foster

A Week In December:

A Week in December Sebastian Faulks, 2011 It's London the week before Christmas 2007 Over seven wintry days we follow the lives of seven characters across the city from a hedge fund manager to a Tube train driver Above the complex patterns of modern urban life the writing on the wall appears in letters ten feet high but the characters refuse to see it As the gripping climax looms they are forced one by one to awake from their blinkered present to confront the true nature of the world they inhabit

Crops and Markets, 1924 *School Life*, 1920 Writing with Authority David Foster, 2006 Writing with Authority Students Roles as Writers in Cross National Perspective offers a comparison of student writers in two university cultures one German and one American as the students learn to connect their writing to academic content David Foster demonstrates the effectiveness of using cross cultural comparisons to assess differences in literacy activities and suggests teaching approaches that will help American students better develop their roles as writers in knowledge based communities He proposes that American universities make stronger efforts to nurture the autonomy of American undergraduates as learner writers and to create apprenticeship experiences that more closely reflect the realities of working in the academic community This comparative analysis identifies crucial differences in the ways German and American students learn to become academic writers emphasizing two significant issues the importance of self directed long term planning and goal setting in developing knowledge based projects and the impact of time structures on students writing practices Foster suggests that students learn to write as knowledge makers using cumulative recursive task development as reflexive writing practices He argues for the full integration of extended self managed knowledge based writing tasks into the American undergraduate curriculum from the onset of college study A cross national perspective offers important insights into the conditions that influence novice writers Foster says including secondary preparations and transitions to postsecondary study Foster proposes that students be challenged to write transformatively to master new forms of authorship and authority based on self directed planning

researching and writing in specific academic communities The text also addresses contested issues of power relations in students roles as academic writers and their perception of personal authority and freedom as writers A course model incorporates significant self directed writing projects to help students build sustainable roles as transformative writers outlines change goals to help teachers develop curricular structures that support cumulative writing projects across the undergraduate curriculum and shows how teachers can develop self directed writing projects in a variety of program environments
