A Widening View:

Pragmatism and the Wide View of Democracy Roberto Frega, 2019-06-22 The aim of this book is to provide a fresh wider and more compelling account of democracy than the one we usually find in conventional contemporary political theory Telling the story of democracy as a broad societal project rather than as merely a political regime Frega delivers an account more in tune with our everyday experience and ordinary intuitions bringing back into political theory the notion that democracy denotes first and foremost a form of society and only secondarily a specific political regime The theoretical shift accomplished is major Claiming that such a view of democracy is capable of replacing the mainstream categories of justice freedom and non domination in their hegemonic function of all encompassing political concepts Frega then argues for democracy as the broader normative framework within which to rethink the meaning and forms of associated living in all spheres of personal social economic and political life Drawing on diverse traditions of American pragmatism and critical theory as well as tackling political issues which are at the core of contemporary theoretical debates this book invites a rethinking of political theory to one more concerned with the political circumstances of social life rather than remaining confined in the narrowly circumscribed space of a theory of government *Programming Languages and Systems* Anthony Widjaja Lin, 2019-11-18 This book constitutes the proceedings of the 17th Asian Symposium on Programming Languages and Systems APLAS 2019 held in Nusa Dua Bali Indonesia in December 2019 The 22 papers presented in this volume were carefully reviewed and selected from 50 submissions They were organized in topical sections named Invited Papers Types Program Analysis Semantics Language Design and Implementation Concurrency Verification and Logic and Automata **SR**

Ogden,2016-03-01 The idea of the professional who bridges both research and practice has been largely overlooked and at times even disregarded by the academic and administrative structures that govern activity in higher education today In international higher education the number of students who now engage in mobility and exchange has expanded globally along with the administrative cadre that manages all facets of internationalization and the quickly growing scholarly attention to understanding the phenomenon In this process two distinct professional categories have emerged those who study it and those who do it the scholars and the practitioners Practitioners are seen as those who manage the daily logistical flow of students and personnel around the globe while scholars are seen as those who conduct research collect and analyze data and publish findings to inform improve and justify the activity Yet this dichotomy is overly simplistic outdated and excludes the large and growing class of hybrid scholar practitioners who now engage regularly in both kinds of activity It is this rapidly growing population of bridge builders that are profiled and discussed in this book through critical essays on the notion of the scholar practitioner and its implication for the further development of international higher education The chapters include detailed analyses from university faculty senior international officers and other high level administrators directors of research centers key leaders from influential professional associations and private organizations managers of study abroad and exchange and graduate students This book launches a much needed dialogue about the perception and reality potential and promise of the scholar practitioner in higher education today It will be of relevance to a wide variety of readers from those within universities and organizations to those who are outside observers of higher education *Afoot and Afield Orange County* Jerry Schad,2010-08-24 This completely updated and expanded new edition in the Wilderness Press Afoot and Afield series is the ultimate guide to the hiking opportunities throughout Southern California s Orange County Featuring 87 trips from serene summits to sparkling beaches Afoot and Afield Orange County covers the Laguna Coast Newport Beach Crystal Cove State Park the Chino Hills Santa Rosa Plateau Ecological Reserve the Santa Ana Mountains and more Trips ranging from short strolls to rigorous daylong treks are all within a short car trip of the Southland s cities **The Cartographic Imagination in Early Modern England** D K Smith,2013-04-28 Working from a cultural studies perspective author D K Smith here examines a broad range of medieval and Renaissance maps and literary texts to explore the effects of geography on Tudor Stuart cultural perceptions He argues that the literary representation of cartographically related material from the late fifteenth to the early seventeenth century demonstrates a new strain not just of geographical understanding but of cartographic manipulation which he terms the cartographic imagination Rather than considering the effects of maps themselves on early modern epistemologies Smith considers the effects of the activity of mapping the new techniques the new expectations of accuracy and precision which developed in the sixteenth century on the ways people thought and wrote Looking at works by Spenser Marlowe Raleigh and Marvell among other authors he analyzes how the growing ability to represent physical space accurately brought with it not just a wealth of new maps but a new array

of rhetorical techniques metaphors and associations which allowed the manipulation of texts and ideas in ways never before possible **Spinal Imaging** Johan W.M. van Goethem, Luc van den Hauwe, Paul M.
