The Great Kantō Earthquake and the Chimera of National Reconstruction in Japan J. Charles Schencking,2013-07-02 In September 1923 a magnitude 7.9 earthquake devastated eastern Japan killing more than 120 000 people and leaving two million homeless Using a rich array of source material J Charles Schencking tells for the first time the graphic tale of Tokyo's destruction and rebirth In emotive prose he documents how the citizens of Tokyo experienced this unprecedented calamity and explores the ways in which it rattled people's deep seated anxieties about modernity While explaining how and why the disaster compelled people to reflect on Japanese society he also examines how reconstruction encouraged the capital's inhabitants to entertain new types of urbanism as they rebuilt their world Some residents hoped that a grandiose metropolis reflecting new values would rise from the ashes of disaster ravaged Tokyo Many however desired a quick return of the city they once called home Opportunistic elites advocated innovative state infrastructure to better manage the daily lives of Tokyo residents Others focused on rejuvenating society morally economically and spiritually to combat the perceived degeneration of Japan Schencking explores the inspiration behind these dreams and the extent to which they were realized He investigates why Japanese citizens from all walks of life responded to overtures for renewal with varying degrees of acceptance ambivalence and resistance His research not only sheds light on Japan's experience with and interpretation of the earthquake but challenges widespread assumptions that disasters unite stricken societies creating a blank slate for radical transformation National reconstruction in the wake of the Great Kanto Earthquake Schencking demonstrates proved to be illusive
