 Ground Operations* Lester Grau, 2025-12-01 Translated to English from the original Soviet General Staff report this is an
 account of the naval support of the Petsamo Kirkenes Operation in October 1944 the only large scale ground naval and air
 operation ever fought in the Arctic With additional contemporary supporting material on wider scale Arctic combat including
 descriptions of combat tactics and weaponry from noted Soviet military scholar James Gebhardt this book provides a
 comprehensive and detailed description of the tactics and strategies employed by both Soviet and German forces during the
 operation from the official Soviet perspective The largest Arctic battle on record involving 133 500 Soviets and 45 000
 Germans and Quisling Norwegians the Petsamo Kirkenes Operation sought to liberate the northernmost part of Norway from
 German occupation during World War II The Soviet navy played a previously unrecognized crucial role in the operation by
 providing fire support and transportation as well as conducting raids and combat landings on the enemy held coast The harsh
 Arctic environment including extreme cold ice and limited daylight posed significant challenges to the Soviet and German
 forces Despite these hardships the Soviet forces achieved their objectives defeated the German Army and successfully
 liberated the area Arctic Naval Combat in Support of Ground Operations is a powerful companion to Gebhardt s previous

 operation s ground offensive Providing a starting point for the study and understanding of combined arms and services
