K-12 Math and Science Education United States. Congress. House. Committee on Science, 2000 Forthcoming Books
Rose Arny, 2001 **Tennessee Teacher**, 1946 **The Nature and Role of Algebra in the K-14 Curriculum** National
Research Council, National Council of Teachers of Mathematics and Mathematical Sciences Education Board, Center for
Science, Mathematics, and Engineering Education, 1998-09-23 With the 1989 release of *Everybody Counts* by the
Mathematical Sciences Education Board MSEB of the National Research Council and the Curriculum and Evaluation
Standards for School Mathematics by the National Council of Teachers of Mathematics NCTM the standards movement in K
12 education was launched Since that time the MSEB and the NCTM have remained committed to deepening the public
debate discourse and understanding of the principles and implications of standards based reform One of the main tenets in
the NCTM Standards is commitment to providing high quality mathematical experiences to all students Another feature of
the Standards is emphasis on development of specific mathematical topics across the grades In particular the Standards
emphasize the importance of algebraic thinking as an essential strand in the elementary school curriculum Issues related to
school algebra are pivotal in many ways Traditionally algebra in high school or earlier has been considered a gatekeeper
critical to participation in postsecondary education especially for minority students Yet as traditionally taught first year
algebra courses have been characterized as an unmitigated disaster for most students There have been many shifts in the
algebra curriculum in schools within recent years Some of these have been successful first steps in increasing enrollment in
algebra and in broadening the scope of the algebra curriculum Others have compounded existing problems Algebra is not yet
conceived of as a K 14 subject Issues of opportunity and equity persist Because there is no one answer to the dilemma of how
to deal with algebra making progress requires sustained dialogue experimentation reflection and communication of ideas and
practices at both the local and national levels As an initial step in moving from national level dialogue and speculations to
concerted local and state level work on the role of algebra in the curriculum the MSEB and the NCTM co sponsored a
national symposium *The Nature and Role of Algebra in the K 14 Curriculum* on May 27 and 28 1997 at the National Academy
of Sciences in Washington D C **The Nature and Role of Algebra in the K-14 Curriculum** Center for Science,
