*A-10C Warthog Flight Manual* Matt Wagner, 2019-05-24 Thank you for your purchase of DCS A 10C Warthog A 10C Warthog is the second module in the Digital Combat Simulator DCS series and follows the critically acclaimed DCS Black Shark. In doing so, this latest module shifts gears from attack helicopter operations to perhaps the most famous Close Air Support aircraft, The Fairchild Republic A 10C Warthog. Warthog builds upon the CAS environment created for Black Shark, pushing it to the next level with new features and game play.

Unmanned Systems of World Wars I and II H. R. Everett, 2015-11-06 The first comprehensive technical history of air, land, sea, and underwater unmanned systems by a distinguished U.S. Navy roboticist. Military drones have recently been hailed as a revolutionary new technology that will forever change the conduct of war. And yet the United States and other countries have been deploying such unmanned military systems for more than a century. Written by a renowned authority in the field, this book documents the forgotten legacy of these pioneering efforts, offering the first comprehensive historical and technical accounting of unmanned air, land, sea, and underwater systems. Focusing on examples introduced during the two world wars, H. R. Everett meticulously traces their development from the mid-nineteenth century to the early Cold War. A pioneering Navy roboticist, Everett not only describes these systems in detail but also reverse-engineers the designs in order to explain how they operated in real-world conditions of the time. More than 500 illustrations, photographs, drawings, and plans, many of them never before published, accompany the text. Everett covers the evolution of early wire-guided submersibles, tracing the development of power, propulsion, communication, and control; radio-controlled surface craft deployed by both Germany and Great Britain in World War I; radio-controlled submersibles; radio-controlled aircraft, including the TDR-1 assault drone project in World War II, which laid the groundwork for subsequent highly classified drone programs; and remote-controlled ground vehicles, including the Wehrmacht's Goliath and Borgward demolition carriers.

*Contrails over the Mojave* George Marrett, 2014-07-15 In *Contrails over the Mojave*, George Marrett takes off where Tom Wolfe's *The Right Stuff* ended in 1963. Marrett started the Air Force Test Pilot School at Edwards AFB only two weeks after the school's commander, Col. Chuck Yeager, ejected from a Lockheed NF-104 trying to set a world altitude record. He describes life as a space cadet, experiencing 15 Gs in a human centrifuge, zero-G maneuvers in a KC-135, Vomit Comet, and a flight to 80,000 feet in the F-104A Starfighter. After graduating from Yeager's Charm School, he was assigned to the Fighter Branch of Flight Test Operations, where he flew the latest fighter aircraft and chased other test aircraft as they set world speed and altitude records. Marrett takes readers into the cockpit as he goes vertical in a T-38, Talon completes high-G maneuvers in an F-4C Phantom, and conducts wet runway landing tests in the accident-prone F-111A Aardvark. He writes about Col. Silver Fox Stephens setting a world speed record in the YF-12 Blackbird and Bob Gilliland testing speed stalls in the SR-71 spy plane, but he also relives stories of crashes that killed test pilot friends. He recounts dead-sticking a T-38 to a landing on Rogers Dry Lake after a twin-engine failure and conducting dangerous tail hook barrier testing.

in a fighter jet without a canopy A mysterious UFO sighting in the night sky above the Mojave Desert known as The Edwards Encounter also receives Marrett's attention Whether the author is assessing a new aircraft's performance or describing the experiences of test pilots as they routinely faced the possibility of death this look at the golden age of flight testing both thrills and informs

**Warplane** Hal Sundt, 2023-10-03 The A 10 is the Air Force's unlikely success story an airplane designed to support the Army and one that ground troops came to venerate Originally conceived with the express purpose of destroying Soviet tanks the Air Force only developed it to keep funding away from the Army's response to the mission the AH 56 Cheyenne helicopter Inspired by the biography of a tank busting German pilot in World War II the engineering and design of the A 10 fell to Pierre Sprey a precocious civilian who'd enrolled at Yale when he was just 15 years old and now barely 30 was exiled to a Pentagon backwater with little if any supervision The end result was one of the finest military aircraft ever built a plane essentially constructed around a 19 5 foot 4 000 pound cannon that fired 30mm depleted uranium bullets at a blistering rate Looking like it was built from discarded airplane parts it was probably the ugliest combat aircraft ever built thus the Warthog appellation But it was also an incredibly reliable ground attack aircraft beloved by ground troops from Iraq to Afghanistan Despite repeated attempts to replace it with stealth aircraft and drones over 280 A 10s remain in service today serviced by dedicated and imaginative engineers and maintainers and defended by a fervent cohort of advocates descended from the Military Reform movement This is the story of intra service rivalries Pentagon obsessions with speed and stealth over tactical simplicity and an aircraft that shows no sign of obsolescence as it nears fifty years in service
